### QUESTION 1

A company has customers in 16 countries. The majority of the customers are in Germany.

A business analyst creates a filter pane for Country, and wants "Germany" listed first. The rest of the countries should be listed in alphabetical order.

Which method should the business analyst use to meet this requirement?

- A. Edit the sheet, select Chart, Properties panel, Custom sorting, then select Germany
- B. Edit the sheet, select Chart, Properties panel, Custom sorting, then click Descending Frequency
- C. In the data manager, edit the table, select Country, then select Order from the data profiling card
- D. In the data manager, edit the table, select Country, then select Order from the column header

Correct Answer: C

---

### QUESTION 2

A client wants to see a bar chart with a single measure and three dimensions: Region, Product Category, and Month.

The business analyst creates a bar chart with the measure, Sum(Revenue).

Which final step should the business analyst take to complete the chart?

- A. Add Region, Product Category, and Month as three different dimensions
- B. Create a single master dimension with Region, Product Category, and Month
- C. Add Region as a dimension, add Product Category and Month as alternate dimensions
- D. Create a cyclic group with Region, Product Category, and Month as dimensions

Correct Answer: A

---

### QUESTION 3

A business analyst needs to create an app showing sales data. The app requirements are as follows:

Compare sales for the current year (CY Sales) versus last year (LY Sales)

CY Sales must always be displayed in blue

LY Sales must always be displayed in yellow

Which steps should the business analyst take to meet these requirements?

- A. 1. Create a KPI with two measures, CY Sales and LY Sales

2. Write an IF expression to set the appropriate colors for each measure
- B. 1. Create CY Sales and LY Sales measures as master items
2. Write an IF expression to set the appropriate colors for the master items
- C. 1. Create CY Sales and LY Sales measures as master items and set the required color for each measure
2. Create one KPI from the two master item measures
- D. 1. Create CY Sales and LY Sales measures as master items and set the required color for each measure using Value colors
2. Create two gauges, one for each measure and set the color for each appropriately

Correct Answer: B

---

#### QUESTION 4

A data architect adds a field to an existing data model that contains new values for the ProductGroup. The business analyst needs to efficiently update the app and meet these requirements: Use the existing charts, which are built using a master item dimension called ProductGroup Existing charts must use the new values for ProductGroup Business users must be able to compare the new and old values

How should the business analyst meet these requirements?

- A. Change the ProductGroup dimension using the new field, and create a new dimension in the master items for the old field.
- B. Create a calculated dimension on the charts to allow the users to compare the new value to the old value.
- C. Replace the dimensions on all charts to use the new ProductGroup field added to the data model.
- D. Use set analysis on the chart measures to see the difference in ProductGroup between the new field and the old field.

Correct Answer: D

---

#### QUESTION 5

A wholesaler needs to show sales and products in a PowerPoint presentation.

The dimensions and measures are: Product Name Sum of Sales Number of Orders

Which two chart types could the business analyst use to meet these requirements? (Choose two.)

- A. Stacked bar chart
- B. Combo chart

C. Scatter plot

D. Distribution plot

E. Treemap

Correct Answer: AD
