QUESTION 1

Source user	Target resource	Permissions
Chris Rogers	Accounting	R U D P

Refer to the exhibit.

An administrator creates this security rule to deny Chris Rogers access to the Accounting stream:

```
((user.name!="Chris Rogers"))
```

After conducting an audit on the Accounting stream, the administrator notices that Chris Rogers can still access the Accounting stream.

What is causing this issue?

- A. The resource filter fails to include App_* to deny access for Chris Rogers
- B. Another security rule is allowing Chris Rogers read access
- C. The security rule contains incorrect syntax for Chris Rogers
- D. The synchronization for Chris Rogers has NOT been completed

Correct Answer: A

QUESTION 2

A system administrator creates a new content library to give the developers access to images. The system administrator tests the new library in the Qlik Management Console (QMC) by adding an image into a text and image object in an app on the hub. The developers are unable to see the new content library, but can see the default library.

What should the administrator do to make sure the developers have access to the new content library?

- A. Build a security rule to give access to the new content library

- B. Have the users create their own individual content libraries in the QMC
- C. Have the users upload their own images to the app in the hub
- D. Store all required images in the default content library

Correct Answer: A

QUESTION 3

An administrator must configure a QA environment to test apps before moving them to production.

Once the apps are ready, each user from the Testers directory must be able to publish their apps to a stream named "App Testing". The users have Read and Publish access to the "App Testing" stream.

All users are assigned the AuditAdmin role in the QMC, but do they NOT have access to the App section of the QMC.

Which security rule should the administrator use to enable access for the users?

- A. Resource: QmcSection_Stream Conditions: ((user.userDirectory="Testers"))
- B. Resource: App* Conditions: ((user.userDirectory="Testers" and resource.owner.userDirectory="Testers"))
- C. Resource: Stream* Conditions: ((user.userDirectory="Testers" and resource.owner.userDirectory="Testers"))
- D. Resource: QmcSection_App Conditions: ((user.userDirectory="Testers"))

Correct Answer: D

QUESTION 4

A system administrator needs to troubleshoot an issue reported with Qlik Sense. The administrator confirms the following: NO hardware issues exist NO other processes are affecting Qlik Sense NO other systems report any issues The network team reports optimal performance

The system administrator decides to check the task execution details and token allocations.

Which two tools should the system administrator use? (Choose two.)

- A. Log Monitor
- B. Sessions Monitor
- C. Operations Monitor
- D. Reloads Monitor
- E. License Monitor

Correct Answer: DE

QUESTION 5

A user reports that the Create new app button does NOT consistently appear when logging into the hub.

The system administrator tries to verify the problem and finds the following: The user has the correct security rule setup The problem can be reproduced in different machines and different browsers No error message is related to the user activities in the Qlik Sense logs The user can see the Create new app button when directly accessing the central node URL The user can NOT see the Create new app button when directly accessing the rim node URL

What is the likely cause of this issue?

- A. The node purpose for the rim node is Development
- B. The node purpose for the rim node is Production
- C. The rim node has NOT been configured for load balancing
- D. The rim node has problems applying the user security rule

Correct Answer: D
