QUESTION 1

Which of the following statements are true about kernel modules? Each correct answer represents a complete solution. Choose all that apply.

A. Kernel modules do not support executable loaders.

B. The kernel module contains extra kernel codes that may be loaded after the loading of the base kernel. Only a minimal resident kernel is loaded into memory at boot time.

C. Kernel modules do not support the device drivers, network drivers, and file system drivers.

D. Whenever a user requests a feature that is not present in the resident kernel, a kernel module is dynamically loaded into memory.

Correct Answer: BD

QUESTION 2

You work as a Network Administrator for Perfect Solutions Inc. The company has a Linux-based network. You have to create user accounts for four new Management Trainees. You also have to create a group named MT and provide membership of this group to the new user accounts. How will you accomplish this?

A. Use the ADDUSER command to create new user accounts and the MT group. Add the users account to the group.

B. Use the USERADD command to create new user accounts and the MT group. Add the user accounts to the group.

C. Use the GROUPADD command to create the MT group. Use the USERADD command to create the user accounts and provide them the membership of the MT group.

D. Use the ADDGROUP command to create the MT group. Use the ADDUSER command to create the user accounts and provide them the membership of the MT group.

Correct Answer: C

QUESTION 3

John works as a Network Administrator for Perfect Solutions Inc. The company has a Linux-based

network. John is working as a root user on the Linux operating system. The company is using the host-

based access control to avoid unwanted access of the malicious users. John wants to add a new user,

which can use X applications from the remote computer. Which of the following commands will John use to

accomplish his task?

Each correct answer represents a complete solution. Choose all that apply.

A. John will run thexhost command.

B. John will execute thestartx command.

C. John will add a new user in the file /etc/Xn.hosts.

D. John will add a new user in the file /etc/Xadd.hosts.

Correct Answer: AC
