**QUESTION 1**

Your CTO is concerned over misuse of corporate storage assets because an employee was found to be hosting a music library on one of the SANs storage arrays. You have been instructed to provide some level of device security to the corporate FC SAN. FC has a number of cost-effective (free) industry standard protection mechanisms that provide or restrict user access to SAN resources.

Which two FC provided mechanisms would you implement first? (Choose two.)

- A. LUN masking
- B. Device authentication and authorization
- C. Zoning
- D. Key management system

Correct Answer: AC

QUESTION 2

You have a file system which allows data and metadata segregation.

How should you accelerate read I/O on the file system while keeping costs low?

- A. Assign the fastest storage to the data portion of the file system.
- B. Assign the fastest storage to the metadata portion of the file system.
- C. Assign fast storage to the data and the metadata portions of the file system.
- D. Keep the file system very small.

Correct Answer: B

QUESTION 3

You have received an emergency call from the night shift after they attempted to merge three small SANs in the engineering department. Once completed, all devices in SANs A and B communicate with one another but SAN C could not communicate with either of the other SANs because the fabric has become segmented.

Which statement is correct?

- A. The port is isolated until a fabric rebuild occurs,
- B. The port is isolated until a fabric re-configuration occurs.
- C. The system administrator must manually correct the issue that caused segmentation (port isolation) and then start the Build Fabric (BF) process.
- D. The system administrator must manually correct the issue that caused port isolation (segmentation) and then start

the Reconfiguration Fabric (RCF) process.

Correct Answer: D

QUESTION 4

Click the Exhibit button.

Referring to the exhibit, which RAID level is shown?

- A. RAID 4
- B. RAID 5
- C. RAID 0
- D. RAID 6

Correct Answer: A

QUESTION 5

Your company asks you to increase restore speeds. What should you do?

- A. Upgrade existing LTO3 drives to LTO5 drives to take advantage of faster read/write speeds and larger tape cartridge sizes.
- B. Add a mirrored disk based backup target that can be used for backups that support point-in-time recovery.
- C. Attach the existing tape libraries to a backup server with local drives configured with RAID 5.
- D. Attach a JBOD drive array to the backup media server to improve the read performance of the backup catalog.

Correct Answer: B
