**QUESTION 1**

The decoupling of a service contract from the service's underlying implementation results in a(n) _____ in the service's level of abstraction because _____ service implementation details helps prevent service consumers from being designed to indirectly couple to the underlying service implementation. Select the correct answer.

- A. increase, hiding
- B. increase, publishing
- C. decrease, hiding
- D. decrease, publishing

Correct Answer: A

QUESTION 2

My service was consuming too much memory so I chose to persist data between invocations to a database. After doing so, I found that the performance of my service declined significantly due to the fact that my database is shared with other applications. As a result, I further isolated the service by giving it its own dedicated database. Which service-orientation principles were involved in this scenario? Select the correct answer.

- A. Service Loose Coupling
- B. Service Reusability
- C. Service Autonomy
- D. Service Statelessness

Correct Answer: CD

QUESTION 3

The "contract first" approach to building services helps realize contract-to-logic coupling. Select the correct answer.

- A. True
- B. False

Correct Answer: B

QUESTION 4

The _____ principle can be applied together with the _____ principle and the _____ principle to establish a service contract that conforms to design standards, does not impose negative dependencies upon service consumers, and does not reveal unnecessary information about its underlying

implementation. Select the correct answer.

- A. Standardized Service Contract, Service Statelessness, Service Reusability
- B. Standardized Service Contract, Service Abstraction, Service Autonomy
- C. Standardized Service Contract, Service Loose Coupling, Service Reusability
- D. None of the above.

Correct Answer: D

QUESTION 5

Fill in the blank for the following definition for the Service Loose Coupling design principle:

"Service contracts impose low _____ requirements and are themselves decoupled from their surrounding environment." Select the correct answer.

- A. consumer coupling
- B. granularity
- C. legacy encapsulation
- D. state deferral

Correct Answer: A
