#### QUESTION 1

Which of the following statements about the Schema Centralization pattern does not make sense?

- A. Up-front analysis effort is required to establish a schema layer independent of and in support of the service layer.
- B. Schemas can be designed and implemented independently from the service capabilities that utilize them.
- C. Multiple technical service contracts can make reference to a single schema.
- D. Services in the same service inventory cannot share the same schemas.

Correct Answer: D

---

#### QUESTION 2

Of the following Web service technologies, which is most commonly associated with the Orchestration pattern?

- A. WS-Addressing
- B. WS-BPEL
- C. WS-ReliableMessaging
- D. WS-Coordination

Correct Answer: B

---

#### QUESTION 3

The Service Facade pattern is often applied in order to separate the from the underlying service implementation so that they can evolve independently.

- A. service agent
- B. service contract
- C. service activity
- D. None of the above.

Correct Answer: B

---

#### QUESTION 4

Which of the following statements is true?

- A. The Legacy Wrapper pattern should not be applied in conjunction with the Process Centralization pattern because legacy systems do not possess enough autonomy to be effectively composed.

B. The Messaging Metadata pattern can be applied to supplement messages with metadata that can be used for tracking purposes when also applying the Reliable Messaging pattern.

C. The Protocol Bridging pattern is often used with the Legacy Wrapper pattern as a means of performing data model transformation between service inventory-wide data models created through the application of the Schema Centralization pattern and the underlying proprietary legacy format.

D. All of these statements are true.

Correct Answer: B

---

#### QUESTION 5

The application of the Redundant Implementation pattern helps increase the autonomy of:

A. redundantly deployed services

B. service agents that perform load-balanced access to services that are not redundantly deployed

C. compositions that compose redundantly deployed services

D. core service logic contained within services that do not rely on the redundantly deployed service

Correct Answer: AC
