**QUESTION 1**

The scope and size of different service inventory architectures can vary.

- A. True
- B. False

Correct Answer: A

QUESTION 2

Which of the following statements is false?

- A. The Contract Centralization pattern positions the service contract as the official entry point into the service logic.
- B. The Contract Centralization pattern can impose performance overhead and requires the use of design standards.
- C. The application of the Contract Centralization pattern enables access to underlying service resources through the use of secondary or unofficial technical contracts.
- D. The Decoupled Contract pattern supports the application of the Contract Centralization pattern.

Correct Answer: C

QUESTION 3

Service logic can be deployed in isolation to autonomy, but services can still autonomy when they are required to access shared data sources.

- A. increase, gain
- B. decrease, gain
- C. increase, lose
- D. decrease, lose

Correct Answer: C

QUESTION 4

The application of the Legacy Wrapper pattern typically results in:

- A. no coupling of the wrapper service logic to the legacy system
- B. no coupling of the wrapper service logic to the service contract
- C. no coupling of the service consumer to the legacy system encapsulated by the wrapper service

D. no coupling of the service logic to the service contract

Correct Answer: C

QUESTION 5

The application of the Protocol Bridging pattern automatically results in the application of the Data Model Transformation pattern.

A. True

B. False

Correct Answer: B
