QUESTION 1

The application of the Intermediate Routing pattern can result in multiple service agents intercepting a message before it arrives at its destination.

- A. True
- B. False

Correct Answer: A

QUESTION 2

The Service Façade pattern is often applied in order to separate the from the underlying service implementation so that they can evolve independently.

- A. service agent
- B. service contract
- C. service activity
- D. None of the above.

Correct Answer: B

QUESTION 3

Which of the following statements are true?

- A. The Redundant Implementation pattern is most useful for services that possess non- agnostic service logic.
- B. The Redundant Implementation pattern is concerned with eliminating single point of failure problems associated with services that are actively reused.
- C. The Redundant Implementation pattern can be supplemented with the Intermediate Routing pattern, which can be applied to load balance access to a redundantly deployed service.
- D. The Redundant Implementation pattern addresses issues of scalability, not issues of availability.

Correct Answer: BC

QUESTION 4

A service façade component can be used to abstract the part of a service architecture that has negative coupling potential.

- A. True

B. False

Correct Answer: A

QUESTION 5

The application of the Redundant Implementation pattern helps increase the autonomy of:

- A. redundantly deployed services
- B. service agents that perform load-balanced access to services that are not redundantly deployed
- C. compositions that compose redundantly deployed services
- D. core service logic contained within services that do not rely on the redundantly deployed service

Correct Answer: AC
