- A. Modify the Authorized option in the /etc/ssh/sshd_config file.
- B. Modify the Permitted option in the ~/.ssh/sshd_config file
- C. Modify the Permitted option is the Assh/sshd_configfile.
- D. Modify the AllowUsers option in the /etc/ssh/sshd_config file.
- E. Modify the Authorized option in the /var/ssh/config file.

Correct Answer: D

QUESTION 3

Which directory contains the initrd file?

- A. /loader/grub
- B. /startup/grub2
- C. /boot/grub2
- D. /loader
- E. /boot
- F. /startup

Correct Answer: C

**QUESTION 4**

What is the default port a VNC Client uses to connect?

- A. TCP 5901
- B. DP 5901
- C. TCP 5801
- D. DP 5801

Correct Answer: A

https://en.wikipedia.org/wiki/Virtual_Network_Computing#:~:text=VNC%20by%20default%20uses%20TCP,Java%2Denabled%20web%2Dbrowser. VNC by default uses TCP port 5900+N,[6][7] where N is the display number (usually :0 for a physical display). Several implementations also start a basic HTTP server on port 5800+ N to provide a VNC viewer as a Java applet, allowing easy connection through any Java-enabled web-browser. Different port assignments can be used as long as both client and server are configured accordingly. A HTML5 VNC client implementation for modern browsers (no plugins required) exists too.[8]

QUESTION 5

What two commands will you use if you are going to compile and install from source code? (Choose two)

- A. compile
- B. make install
- C. assemble
- D. ./configure
- E. ./compile

Correct Answer: BD
