**QUESTION 1**

While troubleshooting a Sugar dashlet error in your web browser, you notice you are consistently receiving a 500 error in response to a particular REST API call.

Which three actions would you perform to gain more insight into the source of the problem? (Choose three.)

- A. View the full list of browser cache contents.
- B. View the Sugar log.
- C. Visit status.sugarcrm.com to confirm there are no service outages.
- D. Consult the Web server PHP error log.
- E. Consult the JavaScript console in the Web browser.

Correct Answer: BDE

QUESTION 2

You attempt to navigate to the Sugar log using the file system and notice that the sugarcrm.log does not exist. You verify that the directory is writeable by the Web server and you know that events that should create log messages are occurring.

What is causing this problem?

- A. The logs are stored in the database and have not yet been flushed to disk.
- B. The configuration variable `~$sugar_config['\logger']['\lever]~` is set to info.
- C. The Sugar log has been renamed in System Settings.
- D. Sugar has been configured to use the Web server's logger.

Correct Answer: C

QUESTION 3

What is the role of the layout component in Sidecar?

- A. to Instantiate fields and render them
- B. to dictate the event handling per field on the page
- C. to dictate the position of views and other layouts on the page
- D. to dictate the position of fields on the page

Correct Answer: C

QUESTION 4

Which Sidecar component is nested within components of the same type?

- A. field
- B. layout
- C. view
- D. model

Correct Answer: B

QUESTION 5

You have a business requirement to perform an additional action after executing the normal REST v10API PUT/[module]/MassUpdate endpoint.

How would you accomplish this task?

- A. Modify the core code for the registered MassUpdateApi endpoint.
- B. Create a custom API class that extends the MassUpdateApi class definition.
- C. Create a logic hook that overrides the MassUpdateApi class definition.
- D. Modify the after_massupdate Web Logic Hook to call your custom endpoint.

Correct Answer: B
