**QUESTION 1**

You notice that several routers are showing an increase in CPU and memory utilization that is starting to concern you. What will likely happen if this trend continues?

- A. Latency through the routers will increase.
- B. The network management system (NMS) will stop monitoring the routers.
- C. Access control lists (ACLs) will be bypassed by the routers.
- D. The routers will deprioritize and drop packets over 1500 bytes.

Correct Answer: A

QUESTION 2

What does the command "ip ssh version 2" do on a Cisco IOS router?

- A. enables secure shell version 2
- B. enables secure socket layer version 2
- C. enables secure system host version 2
- D. enables simple network management protocol version 2

Correct Answer: A

QUESTION 3

While monitoring your network with Orion NPM, you notice that several of the devices in your remote offices periodically go into a "warning" state, but then quickly go back into an "up" state. While the devices are in "warning" state, the users at those sites report normal operations. What is the most likely cause of this occurrence?

- A. Orion NPM is configured to poll too frequently.
- B. During network congestion, ICMP packets are being dropped.
- C. Orion NPM is not configured to poll frequently enough.
- D. Firewall rules are periodically blocking ICMP packets.

Correct Answer: B

QUESTION 4

Wireless users are complaining of sporadic network access issues. After reviewing the data collected by Orion, it seems that there is one specific wireless user that is causing the issue and that every WAP that they connect to is adversely

affected. What should you do to resolve this issue?

- A. block this user's MAC address from connecting to your WAPs
- B. block this user's IP address from connecting to your WAPs
- C. implements QoS to de-prioritize this user's network traffic
- D. increase the bandwidth allocation for the connections to the WAPs from the wired network

Correct Answer: A

QUESTION 5

When using a network management system (NMS) to monitor network interfaces on a router, you notice that statistics are wrong after an interface card is physically removed from the device. What has most likely caused this problem?

- A. interface re-indexing
- B. device configuration
- C. counter rollovers
- D. access lists

Correct Answer: A
