**QUESTION 1**

Sales Reps at Universal Containers sometimes create large files as a part of the Sales process that are too large to share over email. They would like users to be able to share files with customers, but the CISO has requested that any file links shared must be protected by a password.

How can this be accomplished?

- A. Set up an experience cloud site for customers to access files. Share the file with customers via chatter. Customers can then log into the site to access the content.
- B. Sales reps can create a content delivery. During creation, the user should select the option to require a password to access content.
- C. Utilize an AppExchange product for delivering password-protected files to their customers,

Correct Answer: B

---

**QUESTION 2**

Universal Containers (UC) has a team that analyzes customer orders looking for fraud. This team needs access to Invoice records (Custom object, Private OWD). UC has complex rules to control users' access. The Salesforce Architect recommended using Apex managed sharing to meet these requirements.

Which two recommendations should a Salesforce Developer consider when implementing the changes? Choose 2 answers

- A. Use "With Sharing" keyword to make sure record visibility will always be considered.
- B. Use "Without Sharing" keyword to make sure record visibility will be considered.
- C. Use runAs system method to test different users accessing these records.
- D. Use "With Sharing" keyword to enforce field-level security.

Correct Answer: AC

---

**QUESTION 3**

In order to comply with Regulatory Requirements, Universal Containers must store sensitive customer information on-premise. Universal Containers would like this on-premise information to be accessible from Salesforce. What technology can Universal Containers use to achieve this?

- A. Implement a third-party tokenization service.
- B. Implement an on-premise database.
- C. Implement a third-party proxy server.
- D. Implement the Salesforce Shield toolkit.

Correct Answer: C

---

#### QUESTION 4

Universal Containers (UC) has a private Organization-Wide Defaults (OWD) model for the Account object and needs to control the access of records and fields according to these requirements:

1.  
Sales reps can view/edit only their own records and cannot access the field";segmen"; inaccount page.
2.  
Service reps need to view all accounts but cannot edit any information.
3.  
Sales managers can modify any account of reps reporting to them.
4.  
Service managers can modify any account.

How can a Salesforce architect provide an optimal solution for this scenario?

- A. Use profiles, sharing rules, and change OWD to public read-only.
- B. Use profiles, manual sharing, and field-level security.
- C. Use profiles, permission sets, and field-level security.
- D. Use profiles, permission sets, role hierarchy, and field-level security.

Correct Answer: D

---

#### QUESTION 5

Universal Containers has requirement for the Architect to develop Apex Managed Sharing code for the custom Job object. The sharing settings for the Job object are set to Private.

When assigning access level for the record, which two lines of code will cause a DML exception on insert to the database?

Choose 2 answers

- A. `ObjectName.AccessLevel=\\'Edit\\'`
- B. `ObjectName.AccessLevel=\\'All\\'`
- C. `ObjectName.AccessLevel=\\'None\\'`
- D. `ObjectName.AccessLevel=\\'Read\\'`

Correct Answer: BC
