**QUESTION 1**

Which three areas should the Architect review in order to increase performance of "Record Access" and "Sharing" calculations? Choose 3 answers.

A. Custom Object data, to ensure that no Account has more than 10,000 Custom Objects that look up to it.

B. Opportunity data, to ensure that no Account has more than 10,000 Opportunity records that are related to it.

C. Record ownership, to ensure that no user owns more than 10,000 Object records in the system.

D. Apex Managed Sharing triggers, to ensure that no trigger is querying more that 10,000 Object records.

Correct Answer: ABC

**QUESTION 2**

Sales Reps at Universal Containers sometimes create large files as a part of the Sales process that are too large to share over email. They would like users to be able to share files with customers, but the CISO has requested that any file links shared must be protected by a password.

How can this be accomplished?

A. Set up an experience cloud site for customers to access files. Share the file with customers via chatter. Customers can then log into the site to access the content.

B. Sales reps can create a content delivery. During creation, the user should select the option to require a password to access content.

C. Utilize an AppExchange product for delivering password-protected files to their customers,

Correct Answer: B

**QUESTION 3**

Sales reps at Universal Containers (UC) complain about the manual activities they need to perform in order to grant access to supporting internal users (legal, engineering, finance, and so forth) for customer records when they need help. In general, the sales reps involved in the deals will not change.

How can a Salesforce architect help IK to Improve sales reps productivity?

A. Create a permission set with "view all data" and assign to supporting users.

B. Create a public group and replace the account ownership with it.

C. Create a criteria-based sharing rule to grant access to other users.

D. Leverage default Account team.

Correct Answer: CD

**QUESTION 4**

At Universal Containers, users should only see Accounts they or their subordinates own. All Accounts with the custom field "Kay Customer" should be visible to all Senior Account Managers. There is a custom field on the Account record that contains sensitive information and should be hidden from all users, except 3 designated users who require view and edit access. These three users come from different user groups, and will change occasionally. Which three platform security features are required to support these requirements with the minimum amount of effort?

Choose 3 answers

A. Criteria-Based Sharing Rules

B. Owner-Based Sharing Rules

C. Role Hierarchy

D. Apex Managed Sharing

E. Permission Sets

Correct Answer: ACE

**QUESTION 5**

Universal Containers (UC) operates worldwide with offices in more than 100 regions in 10 different countries and has established a very complex role hierarchy to control data visibility. In the new fiscal year UC is planning to reorganize the roles and reassign accounts owners.

Which three features could an architect recommend to avoid problems on this operation? Choose 3 answers

A. Partition data using Divisions

B. Deferred Sharing Recalculation

C. Parallel Sharing Rule recalculation

D. Skinny table

E. Granular Locking

Correct Answer: BCE
