QUESTION 1

For non-SXA websites, why is it recommended to avoid setting presentation details directly on new content items?

A. Defining presentation details on standard values ensures all the fields related to an item\\'s presentation are configured for access by content creators.

B. Sitecore does not allow presentation details to be changed at the content-item level, so they must be set and edited from the standard values of templates.

C. It allows all content items made from the same template to have the same presentation details by default and eliminates additional work during content creation.

D. It forces a prompt to appear when newcontent items are created so Content Authors can finalize the presentation details for the new content items.

Correct Answer: C

QUESTION 2

QUESTION 5

You are using Sitecore MVC to develop an area of a company\\'s website that will require the use of Sitecore\\'s
Personalization Engine to change the rendering that is displayed to a visitor. What type of component binding will allow
the Designer to use personalization to change the component?

A. Static component binding, because you are able to give Authors the ability to change the presentation of the page.

B. Static component binding, because you are able to ensure that content rendered in the placeholder is always the

same when the component is selected.

C. Dynamic component binding, because you are able to ensure that the content rendered in the placeholder is always the same.

D. Dynamic component binding, because you are providing a placeholder to enable flexibility to change the components that make up the presentation of a page.

Correct Answer: D
