QUESTION 1

Prior to the creation of any content items based on templates, you have taken over the creation of data templates from a previous Developer. Based on the design plan, two templates were created, ItemA and ItemB. Both templates have three identical fields: Title, Subtitle, and Description. Based on Sitecore best practices, how would you improve the template design?

- A. Set the template for ItemB as a base template for ItemA and set the template for ItemA as the base template for ItemB to ensure proper inheritance.
- B. Set both templates to inherit from a new base template with the three duplicated fields, removing the fields from the existing templates.
- C. Delete the templates and start over again with new templates, one for the three duplicated fields and one for all the other fields from ItemA and ItemB.
- D. Set the template for ItemB as the base template for ItemA's template and delete the duplicated fields from ItemB's template.

Correct Answer: B

QUESTION 2

A team member incorrectly entered their password several times when attempting to log in to Sitecore and is now locked out of their account. What can you do to unlock this user?

- A. Go to the User Manager, select the user, and click Edit to update user settings.
- B. Go to the Security Editor, select the user, and update their access rights to Sitecore.
- C. Go to the User Manager, select the user, and click Change password to unlock the user's account by resetting their password.
- D. Go to the User Manager, select the user, and click Unlock in the navigation ribbon.

Correct Answer: D

QUESTION 3

With Sitecore MVC, how do you ensure a field cannot be edited when you use the field helper to render content?

- A. Use the non-editable equivalent field type.
- B. Use the DisableWebEdit option.
- C. Set the editable parameter to "false".
- D. Mark the field as non-editable in the field definition item.

Correct Answer: B

QUESTION 4

When using Sitecore MVC, which static class contains information about any current HTTP request?

- A. Sitecore.HttpContext. Request
- B. Sitecore.Context
- C. Sitecore.Request
- D. Sitecore.HttpContext

Correct Answer: D

QUESTION 5

Which of the following is considered a complex field and should not be rendered using the Html.Sitecore().Field() method when developing with Sitecore MVC?

- A. Number
- B. Image
- C. Check box
- D. Single-line text

Correct Answer: C
