### QUESTION 1

What do you do if the serialization command is not available when working with the Sitecore CLI?

- A. You need to execute the ``dotnet restore\`` command in your command prompt.
- B. You need to install the Sitecore Serialization plugin.
- C. You need to restart your Sitecore instance as this indicates a lost connection.
- D. You need to reinstall your Sitecore Content Serialization tool.

Correct Answer: B

---

### QUESTION 2

When developing with the Sitecore ASP.NET Core Rendering SDK, what is the purpose of registering component Tenderers within the rendering host's Startup.cs class?

- A. To document the components that have been created and help the Developer identify which to create
- B. To build a catalog of component offerings for selection from within the Sitecore Experience Editor
- C. To map a Sitecore rendering component name to an implementation
- D. To build an index of available components for use when creating data source items from within the content tree

Correct Answer: C

---

### QUESTION 3

As you create templates and add standard values, you know items created from the templates should automatically have the Title field populated with the name of the item. What should you do to ensure this occurs?

- A. Add `$name` token to the template's standard values Title field.
- B. Set `$name` token in the new item's content Title field.
- C. Set `_name` token in the new item's content Title field.
- D. Add `_name` token to the template's standard values Title field.

Correct Answer: A

---

### QUESTION 4

As a Developer, why should you assign security to roles instead of users when setting up security on a site?

- A. Security can be managed more efficiently as the rights and permissions apply to a group of users.

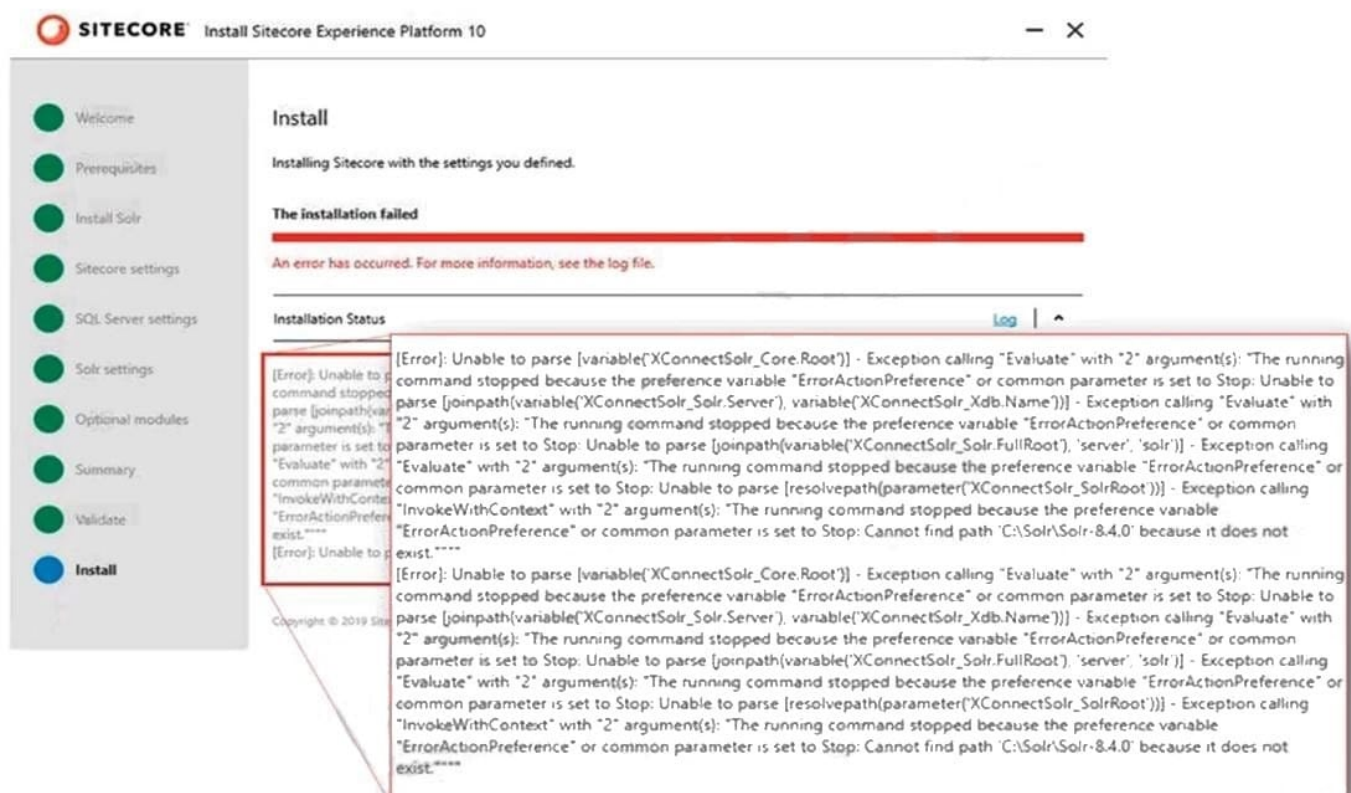

- B. Role-based security allows multiple users to have the same username but different passwords.
- C. Assigning security to roles enables individual rights and permissions to be configured by users.
- D. Individual users with a role can set their own item security permissions.

Correct Answer: A

## QUESTION 5

While using the Sitecore Install Assistant (SIA), you encounter the error below:

Based on the information provided in the image, what is the most likely reason for this install error?

- A. The Sitecore instance username/password were incorrect.
- B. The Solr install path was set incorrectly.
- C. The Solr service was stopped.
- D. The SQL server username/password were incorrect.

Correct Answer: B
