QUESTION 1

For non-SXA websites, why is it recommended to avoid setting presentation details directly on new content items?

A. Defining presentation details on standard values ensures all the fields related to an item\\'s presentation are configured for access by content creators.

B. Sitecore does not allow presentation details to be changed at the content-item level, so they must be set and edited from the standard values of templates.

C. It allows all content items made from the same template to have the same presentation details by default and eliminates additional work during content creation.

D. It forces a prompt to appear when newcontent items are created so Content Authors can finalize the presentation details for the new content items.

Correct Answer: C

QUESTION 2

A company you develop for wants to temporarily change the design for their main page for a company anniversary celebration. Because this will be a specific version of the main page that is published for a specific period, which Sitecore feature enables you to accomplish this change while easily allowing you to revert to the original design?

A. Final layouts

B. Shared layouts

C. Restricted layouts

D. Versioned layouts

Correct Answer: D
