Correct Answer: B

QUESTION 4

Security patches that were issued to address a security flaw in the database server software have failed to install. All other OS security patches applied successfully. Which of the following is the MOST likely cause of the failure?

A. Database patches typically require a reinstall of the database server software.

B. The server was unavailable during the patch window.

C. The OS patches and database patches cannot be deployed together.

D. The account used does not have permission to patch the database software.

Correct Answer: D

QUESTION 5

An administrator needs to maintain 1TB of storage for mission critical application data. Fault tolerance and performance are the most important considerations. Cost is not a factor at all. Which of the following RAID configurations would be the BEST choice to meet the criteria for the storage array?

A. RAID 6 with six 250GB hard drives

B. RAID 10 with eight 250GB hard drives

C. RAID 5 with five 250GB hard drives

D. RAID 0 with eight 250GB hard drives

Correct Answer: B
