**QUESTION 1**

What is Quality Assurance?

- A. The evaluation of processes and standards that govern quality management in a project to ensure that they continue to be relevant.
- B. Identification and definition of the product required from a Sprint and the project along with the Acceptance Criteria, any development methods to be followed, and the key responsibilities of Scrum Team members in regards to quality.
- C. The execution of the planned quality activities by the Scrum Team in the process of creating deliverables that are potentially shippable.
- D. A Scrum approach in which the team learns from experience and stakeholder engagement to constantly keep the Prioritized Product Backlog updated with any changes in requirements.

Correct Answer: A

Quality is required not only in products, but also in processes. Quality assurance refers to the evaluation of processes and standards that govern quality management in a project to ensure that they continue to be relevant. Quality assurance activities are carried out as part of the work. In fact, quality assurance is a significant factor of the definition of Done. The deliverable isn't complete if appropriate quality assurance has not been conducted. Often, quality assurance is demonstrated during the Sprint Review Meeting.

**QUESTION 3**

Which of the following is a responsibility of the Scrum Master in the context of change in Scrum?

- A. Eliminating all changes that may affect the quality of deliverables and processes
- B. Facilitating identification of Change Requests by the Scrum Team and their assessment and prioritization by the Product Owner.

C. Providing requests for changes in a project.

D. Approving changes that are amended, removed, or added according to project requirements, and communicating the same to the Scrum Team.

Correct Answer: B

---

#### QUESTION 4

You are working in a \$50 million project to remove weeds from National monument areas.

You are responsible for achieving maximum business value for the project, and represent the Voice of the Customer. What role do you play in this project?

- A. Scrum Master.
- B. Product Owner.
- C. Sponsor.
- D. Scrum Guidance Board.

Correct Answer: B

The Product Owner is the person responsible for achieving maximum business value for the project. He or she is also responsible for articulating customer requirements and maintaining business justification for the project.

The Product Owner represents the Voice of the Customer.
