Test Account

An administrator has configured the Symantec Endpoint Protection Manager (SEPM) to use Active Directory authentication. The administrator defines a new Symantec Endpoint Protection administrator named Sep_SysAdmin, configured to use Directory Authentication. Which password needs to be entered when the administrator logs in to the SEPM console as Sep_SysAdmin?

- A. the password for the Active Directory user that was mapped with Sep_SysAdmin
- B. the password for the user named Sep_SysAdmin that was created in SEPM
- C. the password for the user named Sep_SysAdmin that was created in Active Directory
- D. the password for the Administrator account in Active Directory

Correct Answer: A

QUESTION 2

A company needs to forward log data from Data Center A to Data Center B during off peak hours only. How should the company architect its Symantec Endpoint Protection environment?

- A. set up two sites and schedule replication between them during off peak hours
- B. set up a single site and configure the clients to send their logs to the Manager during off peak hours
- C. set up a Group Update Provider (GUP) at Data Center A and configure it to send logs during off peak hours
- D. set up a LiveUpdate Server at Data Center A and configure it to send logs during off peak hours

Correct Answer: D

QUESTION 3

An administrator is responsible for the Symantec Endpoint Protection architecture of a large, multi-national company with three regionalized data centers. The administrator needs to collect data from clients; however, the collected data must stay in the the local regional data center. Communication between the regional data centers is allowed 20 hours a day. How should the administrator architect this organization?

- A. set up 3 domains
- B. set up 3 sites
- C. set up 3 locations
- D. set up 3 groups

Correct Answer: B

QUESTION 4

A company organizes its clients into two groups the Symantec Endpoint Protection Manager (SEPM) group with all the SEPMs and a Desktops group with all other systems. An Application and Device Control policy is used with the "Block modifications to hosts file" rule set enabled. This policy is applied to all groups in the company. How can an administrator modify the hosts file on the SEPM systems, while minimizing risks posed to the company?

- A. Withdraw the policy from all clients, modify the hosts files, and reassign the policy.
- B. Withdraw the policy from the SEPM group, modify the hosts files, and reassign the policy.
- C. Modify the hosts file using an operating system-based system account.
- D. Temporarily disable Network Threat Protection on each client when modifying the hosts file.

Correct Answer: B

QUESTION 5

A company selected Opera 10 as its corporate browser. Drive-by downloads are occurring and SONAR intercepts the resulting scripts. How should the company proceed to minimize the occurrence of drive-by downloads?

- A. Upgrade to Opera 11.
- B. Use Internet Explorer or Firefox.
- C. Enable browser protection.
- D. Reboot the Symantec Endpoint Protection client.

Correct Answer: B
