**QUESTION 1**

Which Symantec Endpoint Protection 12.1 protection technology provides the primary protection layers against zero-day network attacks?

- A. SONAR
- B. Client Firewall
- C. Intrusion Prevention
- D. System Lockdown

Correct Answer: C

---

**QUESTION 2**

An administrator enabled the default application control rule "Block writing to USB Drives", but needs to modify it so that clients can write to a specific make and model of company-authorized, encrypted USB drive. How should the administrator proceed?

- A. Edit the rule set and add the device ID to the exceptions.
- B. Edit the rule set and add a condition after the block condition to allow access to the specific device.
- C. Edit the rule set and add a rule after the block rule to allow access to the specific device.
- D. Using DevViewer, plug the device into the Symantec Endpoint Protection Manager and select "Add Device to Manager".

Correct Answer: A

---

**QUESTION 3**

An organization employs laptop users who travel frequently. The organization needs to acquire log data from these Symantec Endpoint Protection clients periodically. This must happen without the use of a VPN. Internet routable traffic should be allowed to and from which component?

- A. Group Update Provider (GUP)
- B. LiveUpdate Administrator Server (LUA)
- C. Symantec Endpoint Protection Manager (SEPM)
- D. IT Analytics Server (ITA)

Correct Answer: C

---

**QUESTION 4**

A company allows users to create firewall rules. During the course of business, users are accidentally adding rules that block a custom internal application. Which steps should the Symantec Endpoint Protection administrator take to prevent users from blocking the custom application?

- A. create an Allow Firewall rule for the application and place it at the bottom of the firewall rules below the blue line
- B. create an Allow Firewall rule for the application and place it at the bottom of the firewall rules above the blue line
- C. create an Allow All Firewall rule for the fingerprint of the file and place it at the bottom of the firewall rules above the blue line
- D. create an Allow for the network adapter type used by the application and place it at the top of the firewall rules below the blue line

Correct Answer: B

---

#### QUESTION 5
