QUESTION 1

There is a firewall in place between Symantec Messaging Gateway 10.5 and the Internet at the customer site.

An administrator needs to use an external NTP server on the Internet for time synchronization.

Which port must be open on the firewall to allow this?

- B. 389
- C. 80
- D. 123

Correct Answer: D

QUESTION 2

During which phase of inbound message flow does Symantec Messaging Gateway 10.5 accept, reject, or defer messages on the basis of the message envelope?

- A. SMTP delivery
- B. message filtering
- C. SMTP session
- D. message routing

Correct Answer: C

QUESTION 3

Which two policy actions are available within Symantec Messaging Gateway version 10.0? (Select two.)

- A. create a quarantine incident
- B. deliver the message to the Outlook spam folder
- C. send notification to the administrator
- D. terminate the sender's connection
- E. create an informational incident

Correct Answer: AE

QUESTION 4

An administrator tests the default antivirus policies by sending a message with an encrypted attachment. When the administrator checks the recipient inbox, what appears?

- A. The test email appears with a modified subject line.
- B. A system-generated message appears concerning an unscannable attachment.
- C. A message with a pointer to the Suspect Virus Quarantine appears.
- D. The email is missing due to deletion by the system.

Correct Answer: A

QUESTION 5

How does enabling and configuring sender authentication options in Symantec Messaging Gateway 10.5 help to protect against spam?

- A. by protecting against messages sent from trusted partners
- B. by protecting against messages sent using a Sendmail MTA
- C. by protecting against messages with a forged message ID
- D. by protecting against messages with forged sender domains

Correct Answer: D
