**QUESTION 1**

Using the "Tax System" specification scenario as described above, using boundary value analysis, which would be the most interesting test set to explicitly test one single boundary value as defined in the "Tax System" specification?

Test set (i)		
Civil Status	Salary	Number of Children
Married	€ 20.000	4
Not Married	€ 22.000	3
Married	€ 18.000	2
Test set (ii)		
Civil Status	Salary	Number of Children
Not Married	€ 19.000	8
Not Married	€ 20.000	6
Married	€ 50.000	4
Test set (iii)		
Civil Status	Salary	Number of Children
Married	€ 20.000	10
Not Married	€ 22.000	5
Not Married	€ 20.001	0
Test set (iv)		
Civil Status	Salary	Number of Children
Not Married	€ 22.000	1
Not Married	€ 18.000	2
Married	€ 18.000	3

[K3] 3 credits

- A. (i)
- B. (ii)
- C. (iii)
- D. (iv)

Correct Answer: D

QUESTION 2

A specification states: "If the fossil is Jurassic in origin then it must be catalogued under Mesozoic post Triassic and cross referred to political limestone. If it is a tooth, then it must be catalogued under Dental remains. If the fossil is both Jurassic in origin and a tooth it will be catalogued under Mesozoic post Triassic and cross referred to political limestone only." The tester analyses this for decision table testing and finds the following conditions and actions: C1: Jurassic C2: tooth A1: Catalogue as Mesozoic post Triassic A2: Cross refer to political limestone A3: Catalogue as

Dental remains How many test cases will a collapsed decision table have? [K3] 2 credits

- A. 2
- B. 3
- C. 4
- D. 6

Correct Answer: B

QUESTION 3

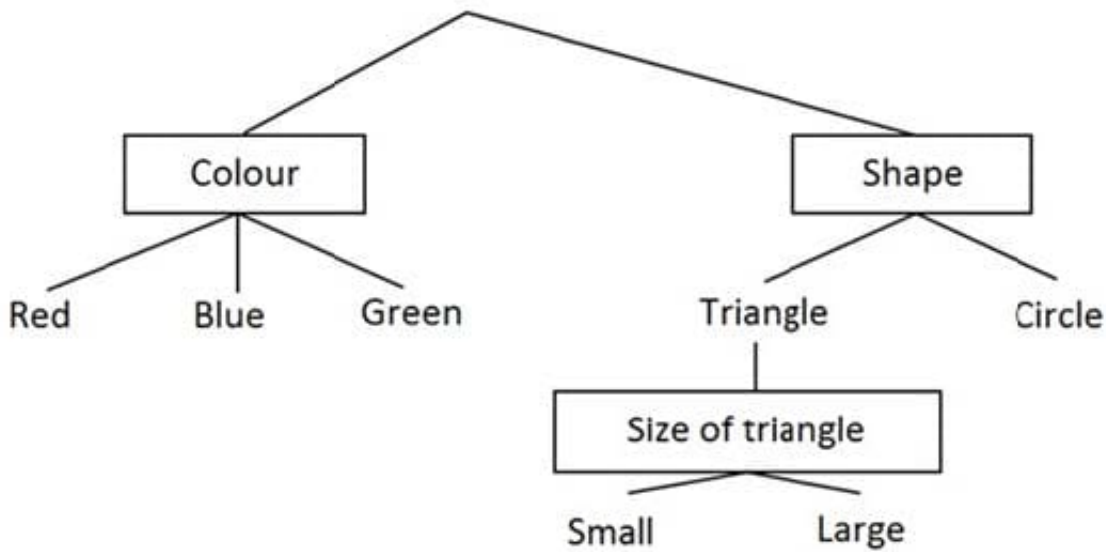

Analyzing the requirement, "The system shall allow cash advances of at least 200 Euros for all supported credit cards. The correct list of credit cards is American Express, Diners, VISA, Mastercard and Eurocard." There are arguments to be made for several test design techniques. Which of the following test design techniques is LEAST likely to be used for identifying test cases for the requirement? [K4] 3 credits

- A. Boundary value analysis
- B. Equivalence Partitioning
- C. Classification Tree Method
- D. State Transition Testing

Correct Answer: D

QUESTION 4

Based on the classification tree shown below, how many test cases are required using the classification tree method?

[K3] 2 credits B. 3

C. 4

D. 6

Correct Answer: B

QUESTION 5

You are working as a tester on a project to develop a point-of-sales system for grocery stores. Which of the following is a product risk that could be identified for such a system? [K3] 2 credits
