QUESTION 1

You have two lists in a workflow:

1) FranceCities which contains city names in France 2) IndiaCities which contains city names in India In order to show all city names from both lists, which expression should be used as the input to a MessageBox?

A. String.Join(",", FranceCities.ToString + IndiaCities.ToString)

B. FranceCities.Concat(IndiaCities).ToList.ToString

C. String.Join(",", Enumerable.Concat(FranceCities, IndiaCities).ToList)

D. Enumerable.Concat(FranceCities, IndiaCities).ToString

Correct Answer: C

QUESTION 2

What are the differences between a partial selector and a full selector?

A. Partial selectors in activities always take longer to execute. Full selectors can contain wildcards.

B. Partial selectors are recommended when switching between multiple windows. Full selectors can only contain one line.

C. Partial selectors cannot contain wildcards. Full selectors always include the application name.

D. Partial selectors can only be configured on activities inside containers. Full selectors always contain information about the top-level window.

Correct Answer: D
