**QUESTION 2****HOTSPOT**

A developer has a datatable, dt\_Companies, containing data for numerous companies. In the datatable, RevenueSize is a numeric column representing the current revenue in USD and YearFounded is a numeric column representing the year the company was founded. The developer does not want companies with both of the following conditions to appear in dt\_FilterCompanies:

1.

Companies that were founded before the year 2010

2.

Companies having revenues of 500,000 USD or less

Instructions: Using the drop-down lists for Column, Operation, and Value, configure the Filter Wizard of the Filter Data Table activity to place the filtered results in dt\_FilterCompanies.

Hot Area:
