QUESTION 1

A developer is creating a Lightning Web Component (LWC) and wants to make sure the visual experience is consistent with Cloud Kicks branding. The developer asks their UX Designer about the Salesforce Lightning Design System (SLDS) styling hooks.

How should the designer describe them?

- A. They use standard CSS properties to directly style HTML elements.
- B. They use standard CSS properties to easily style base and custom components.
- C. They use custom CSS properties to directly style HTML elements.
- D. They use custom CSS properties to easily style base and custom components.

Correct Answer: B

The designer should describe the Salesforce Lightning Design System (SLDS) styling hooks as using standard CSS properties to easily style base and custom components. SLDS styling hooks allow developers to quickly and easily apply CSS classes to HTML elements, enabling consistent styling across both base and custom components. This allows developers to quickly and easily apply branding and styling to their Lightning Web Components, without needing to write custom CSS. For more information about SLDS styling hooks, please see the following Salesforce documentation: https://developer.salesforce.com/docs/component-library/documentation/lwc/lwc.use_slcs_styles_hooks

QUESTION 2

Sales managers want their team members to help each other close Opportunities. The Opportunity and Account organization-wide defaults are private. To grant Opportunity access to sales reps on the same team, owner ship-based sharing rules were created for each team.

What is the side effect of this approach?

- A. All sales reps will have Read access to Accounts for all Opportunities.
- B. Sales Reps on the same team will have Edit access to the Accounts for Opportunities owned by their team members.
- C. Sales reps on the same team will have Read access to the Accounts for Opportunities owned by their team members.
- D. All sales reps will have Read access to all Accounts.

Correct Answer: C

QUESTION 3

Which two resources of the Salesforce Lightning Design System (SLDS) could be used to make custom application look, act, and sound like Salesforce? Choose 2 answers

- A. Full functional components
- B. Blueprints and tokens
- C. In-App Guidance
- D. Guidelines for voice and tone

Correct Answer: AB

QUESTION 4

A Development team is not valuing the results of a usability testing session.

How should acceptance of the results be increased?

- A. Include links to best practice articles for each finding.
- B. Invite team members to observe usability sessions.
- C. The Development team can perform script testing.
- D. Create a new prototype to demonstrate improvement.

Correct Answer: A

QUESTION 5

After conducting user interviews, a UX Designer finds an equal amount of users prefer to use the Comply density setting as the Compact density setting while viewing records details.

Which one token and one utility class should be suggested to the developers to ensure custom component respect these settings? Choose 2 answers

- A. varSpacingMedium
- B. specing Small
- C. slds-p-around_medium
- D. slds ar-m-around_small

Correct Answer: CD
