-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

Your company is currently in the middle of transitioning to a private cloud, therefore your datacenter has a combination of legacy physical servers, vCenter (e.g. non-cloud) VMs and cloud-based VMs. You'd rather not have to deal with three separate interfaces for deploying and managing the life-cycle of all three types of servers. Which of the following can you use to perform life-cycle management for all of these servers during the transition period?

- A. vFabric Suite
- B. vCloud Director
- C. vCenter
- D. vCloud Automation Center

Correct Answer: D

---

**QUESTION 2**

An administrator is considering a private cloud solution. The existing environment contains a number of print servers and a systems monitoring server. These applications are considered which type of workload?

- A. Elastic
- B. Infrastructure
- C. Transient
- D. Management

Correct Answer: B

---

**QUESTION 3**

Management is concerned that keeping track of chargeable costs may overwhelm Chargeback's ability to keep up in a rapidly growing environment. You assure them Chargeback will be able to handle this growth due to which of the following architectural components?

- A. Statistic Modules
- B. Data Collectors
- C. Data Collection Appliances
- D. Chargeback Plug-ins

Correct Answer: B

---

---

#### QUESTION 4

Your development group tells you they are having problems with a specific application, but only when it's running on Ubuntu. It works fine on all other operating systems. Which product will best address this issue?

- A. vCloud Connector
- B. vFabric Hyperic
- C. vFabric Application Director
- D. vCenter Server

Correct Answer: B

---

#### QUESTION 5

You have Site Recovery Manager (SRM) in place to protect critical vCloud servers in the event of a disaster. Over lunch, a manager asks you why SRM is configured to protect only the vCloud servers and not the actual department workload VMs. What do you tell her?

- A. The workload VMs are on fenced networks, which can't be failed over.
- B. SRM can't fail over the workload VMs, but it is a simple matter to restart them once the vCloud servers have failed over.
- C. Workload VM failover is implied when you failover the vCloud infrastructure servers.
- D. vCloud workloads can be migrated with vCloud Director once it has failed over and so are not required to be protected with SRM.

Correct Answer: C
