**QUESTION 1**

You work in a highly regulated, secure environment. You have been tasked with finding a solution that will analyze the environment and report on any changes in the environment to ensure you meet the compliance requirements in your industry. Which VMware product can help to provide this solution?

- A. vCenter Operations Manager
- B. vCenter Change Management
- C. vCenter Configuration Manager
- D. vCloud Director

Correct Answer: C

QUESTION 2

A large hospital has called you to consult on their new VMware deployment. They are concerned about the management for the new virtual networks. What can you tell them about the virtual switches?

- A. Standard switches can only be managed through the command line
- B. Distributed switches cannot be managed by using vCenter
- C. Standard switches can be managed through vCenter, or by going directly to the ESXi host
- D. Distributed switches can only managed through the physical ESXi server

Correct Answer: A

QUESTION 3

You are describing virtual machines to your manager. He asks you how virtual machines communicate on the network. Which of the following statements is true?

- A. Virtual machines require special hardware network cards to communicate on the physical network.
- B. Virtual machines are always directly connected to a physical network card in your ESXi host.
- C. Virtual machines are unable to communicate on the physical network.
- D. Virtual machines use virtual network cards from VMware to communicate on the physical network.

Correct Answer: D

QUESTION 4

You are the VMware administrator for your local hospital. A fellow administrator has asked what role a datastore plays in the environment. Which of the following is a good definition of a datastore?

- A. A datastore is used by the hypervisor to swap local memory content if needed
- B. A datastore is used as the destination for the core dump file
- C. A datastore is used by the hypervisor to store logs and performance data
- D. A datastore is where virtual machine's files are stored

Correct Answer: D

QUESTION 5

You have a large virtual environment with workloads that vary widely throughout the day. You want an automated system to quickly load balance as conditions change. What vSphere feature performs this task?

- A. Distributed Resource Scheduler (DRS)
- B. vMotion
- C. vSphere Replication (VR)
- D. Storage DRS (SDRS)

Correct Answer: D

Reference: <http://www.vmware.com/products/vsphere/features-storage-drs>
