QUESTION 2

You are in an interview for a position as a VMware administrator. You have been asked for a definition for virtual switch. Which of the following would be a good definition?

- A. A virtual switch can act like a router handling traffic between VMs on separate subnets
- B. A virtual switch allows up to 500 VMs to share the same 1 GbE adapter through Network I/O Control (NIOC)
- C. A virtual switch allows VMs to communicate with each other and with physical devices.
- D. A virtual switch allows VMware to segment a physical switch to isolate VM traffic

Correct Answer: C

QUESTION 3

Which of the following features is a benefit of shared storage within a VMware environment?

- A. Allows storage to be deployed from a single vendor
- B. Provides the ability to backup data more efficiently
- C. Provides the ability to view the disk I/O more efficiently
- D. Allows for the deployment of DRS and HA clusters

Correct Answer: D

QUESTION 4

You have been receiving complaints that the mail server has been slow. You investigate and determine that a print

server in the same storage location is using much of the bandwidth to the storage array. Which feature will allow you to increase the priority of the mail server so that it meets the SLA defined for it?

- A. Storage I/O Control (SIOC)
- B. Storage vMotion
- C. Distributed Resource Scheduler (DRS)
- D. vSphere Data Protection

Correct Answer: A
