---

**QUESTION 3**

You have been asked by your supervisor to define some virtualization terms for her. She has asked about the difference between a bare-metal hypervisor and a host-based hypervisor. What can you tell her?

- A. The bare-metal hypervisor is installed directly on the physical hardware, just like any other operating system
- B. The host-based hypervisor is used to virtualize server operating systems and server-based applications only.
- C. The bare-metal hypervisor can only be used with 32-bit hardware
- D. The host-based hypervisor is used when you want to virtualize UNIX and Linux-based applications.

Correct Answer: A

#### QUESTION 4

Which vSphere feature is used to help achieve greater uptime SLAs?

- A. Storage vMotion
- B. Distributed Resource Scheduler
- C. High Availability
- D. Site Recovery Manager

Correct Answer: D

---

#### QUESTION 5

What vCenter feature does Storage DRS use to automate the load balancing of virtual machine storage?

- A. vMotion
- B. High Availability
- C. Storage vMotion
- D. Fault Tolerance

Correct Answer: C
