**QUESTION 1**

During the design phase, one of the constraints listed is that because the organization is already using SQL Server 2008 in-house, a SQL Server database would have to be used for the vCenter Server. Because of the constraint,

- _____.
- A. the organization would have to use VCSA since it supports SQL Server
 - B. the organization would have to use the Windows versions of the vCenter Server, but the database would have to be internal to the vCenter Server
 - C. either the VCSA or the vCenter Server can be used
 - D. the Windows version of vCenter Server would have to be used because VCSA does not support SQL Server

Correct Answer: D

QUESTION 2

A design choice guided by a best practice does not need to be justified.

- A. True
- B. False

Correct Answer: B

QUESTION 3

VMware HA can protect application corruption issues by using VM monitoring functionality.

- A. True
- B. False

Correct Answer: B

QUESTION 4

You are a VMware architect working at a company where a business application is being rolled out. Based on conversations with the business, you establish that the RTO requirement is 2 hours, and the RPO requirement is 3 hours. Consider a situation in which the VMware platform is out of service following multiple hardware issues. The application dropped from service at 2 p.m. To meet the application business SLA, which of the following is true?

- A. When the application is brought online, the data must be from a version as of 4 p.m.
- B. When the application is brought online, the data must be from a version as of 11 a.m.

Correct Answer: B

QUESTION 5

You have been asked to review a vSphere HA design. The admission control policy is set to "The number of host failures tolerated." The virtual machines vary in size, and use of VM-based reservations is common. Which of the following should be recommended? (Choose three)

- A. The platform has reservations removed unless specifically required by an application vendor verified or workload verified requirement.
- B. The platform should be configured with reservations based on resource pools
- C. The platform should be configured with an appropriate slot size or the admission control policy changed to a percentage based policy.
- D. The platform should not be configured with reservations based on resource pools

Correct Answer: ABC
