**QUESTION 1**

An administrator notices that when a virtual machine is placed into a resource pool, a warning indicates that the virtual machine will receive a very large percentage of the total shares for memory. Which action can be taken to resolve this problem?

- A. Increase the memory resource allocation to the resource pool.
- B. Increase the share value for the resource pool.
- C. Change the shares setting from custom to high, medium, or low for the virtual machine.
- D. Decrease the memory allocation for the virtual machine.

Correct Answer: C

QUESTION 2

An administrator is configuring admission control settings for a vSphere HA cluster. The administrator selects the option Allow VMs to Be Powered on Even if They Violate Availability Constraints. Which two events occur during an ESXi host failure? (Choose two.)

- A. Virtual machines with a High restart priority are restarted first.
- B. Virtual machines with a Low restart priority are not restarted.
- C. HA will not restart virtual machines configured for FT.
- D. Virtual machines with VM Monitoring set to Enabled are restarted.

Correct Answer: AC

QUESTION 3

Windows VM is experiencing the poor application performance. The suspected issue is a lack of available memory. Windows Task Manager shows 30% of the memory within the VM is not currently being used. What this indicate and what could be checked next?

- A. Windows Task Manager is not reading actual memory usage in the VM. Windows System Monitor should be used to get precise reading on memory usage.
- B. The application problems are definitely due to a non-memory related problem. CPU affinity settings should be checked for this VM.
- C. The VM has memory available, however it may not actually have "Physical" memory available. VMkernel swap activity on the ESX Server host should be checked next.
- D. The application problems are definitely due to a non-memory related problem. CPU utilization should be checked next using Windows Task Manager.

Correct Answer: C

**QUESTION 4**

In vSphere, a bound physical NIC can be configured to transmit and receive jumbo frames. What is the default maximum transmission unit (MTU) in vSphere?

- A. 1500
- B. 5500
- C. 9000
- D. 9500

Correct Answer: A

QUESTION 5

An administrator is working to update the hosts and virtual machines in a vSphere 5.x deployment using Update Manager Baselines. Other than host patches, which three items require a separate procedure or process to update? (Choose three.)

- A. Operating system patches
- B. Virtual Appliance updates
- C. Virtual Machine Virtual Hardware upgrades
- D. VMware Tools on machines without VMware Tools already installed
- E. Application patches within the virtual machine

Correct Answer: ADE
