## **QUESTION 1**

Immediately after installing ESXi, an administrator observes that the Configure Lockdown Mode option is grayed out in the Direct Console User Interface (DCUI). What is the most likely explanation?

- A. The host has not yet been added to a vCenter Server.
- B. The BIOS on the host does not have NX/XD enabled.
- C. The ESXi host is running in evaluation mode.
- D. The host requires a reboot before this feature is available.

Correct Answer: A

## **QUESTION 2**

The vSphere administrator attempts to connect to an ESXi host via an SSH client and receives the following security alert: -- Exhibit -

aTTY Sec	urity Alert	x
	The server's host key is not cached in the registry. You have no guarantee that the server is the computer you think it is. The server's rsa2 key fingerprint is: ssh-rsa 2048 04:82:51:45:19:24:77:44:b8:05:07:fd:24:12:b4:d2 If you trust this host, hit Yes to add the key to PuTTY's cache and carry on connecting. If you want to carry on connecting just once, without adding the key to the cache, hit No. If you do not trust this host, hit Cancel to abandon the connection.	2
	Yes No Canc	el

-- Exhibit -The vSphere administrator needs to determine whether the RSA key fingerprint shown in the security alert is the fingerprint of the intended ESXi host.

Which tool should the vSphere administrator use?

- A. Direct Console User Interface
- B. vSphere Client
- C. vSphere Web Client

#### D. vSphere Management Assistant

Correct Answer: A

### **QUESTION 3**

A vSphere administrator needs to upgrade a single extent VMFS3 datastore to VMFS5 and expand it to 4TB in size. The storage administrator has already expanded the underlying LUN to 4TB. Which steps should the vSphere administrator take?

A. Expand the VMFS3 datastore to 4TB and then upgrade to VMFS5

B. Upgrade the datastore to VMFS5, manually change the partition scheme to GPT, and then expand the datastore to 4TB

C. Upgrade the datastore to VMFS5 and then expand it to 4TB

D. Change the block size of the VMFS3 datastore to 1MB, upgrade the datastore to VMFS5, and expand it to 4TB

Correct Answer: C

#### **QUESTION 4**

#### -- Exhibit -

₩ @ 🗉 👷				
	Settings Alarm Definitions T	ags Permissions Network Protocol	Profile Ports	
- CP_DCV_Example				
E Production	44	Policies	۲	Edit
VCP_DCV_Example-DV	Properties	Egress traffic shaping	0	•
✓ mvds-site-a	Policies	Status:	Disabled	
Anagement Network		Average bandwidth:	<u></u>	
Storage Network		Peak bandwidth:	12	
NM Network		Burst size:	<u></u>	
A vMotion Network		VLAN		
_		Type:	VLAN	
		VLAN ID:	3389	
		Teaming and failover		
		Load balancing:	Route based on originating virtual port	
		Network failure detection:	Link status only	
		Notify switches:	Yes	
		Fallback:	Yes	
		Active uplinks:	Uplink 1, Uplink 2	•
				12

--Exhibit -A vSphere administrator assigns VLAN 3389 to the Production port group on the VCP\_DCV\_Example vSphere Distributed Switch. After the change, users report a loss of connectivity to their applications. Further analysis provides the following data:

The cluster has not had a ESXi host failure.

Application functioned normally prior to the change.

The loss of connectivity occurred immediately following the change. Which condition would cause this loss of connectivity?

Α.

The physical switch ports used by the vmnics have not been configured with 802.1Q.

Β.

Maintenance Mode was initiated on one of the hosts in the cluster. Connectivity will resume after the virtual machines are migrated.

C.

All uplinks were removed from the VCP\_DCV\_Example switch and added to another virtual switch.

D.

A load balancing setting on the port group conflicts with the load balancing setting of the switch.

Correct Answer: A

## **QUESTION 5**

Which is the simplest baseline group combination an administrator could create to upgrade hosts, VMware tools, and virtual machine hardware to the latest versions using Update Manager?

A. One baseline group that contains the host upgrade baselines and one baseline group that contains the VM Hardware and VMware Tools upgrade baselines

B. One baseline group that contains the host upgrade and vCenter upgrade baselines

C. One baseline group that contains the host, VMware tools, and VM Hardware upgrade baselines

D. One baseline group that contains the Data Center upgrade baseline and one baseline group that contains the VM upgrade baseline

Correct Answer: A
