### QUESTION 1

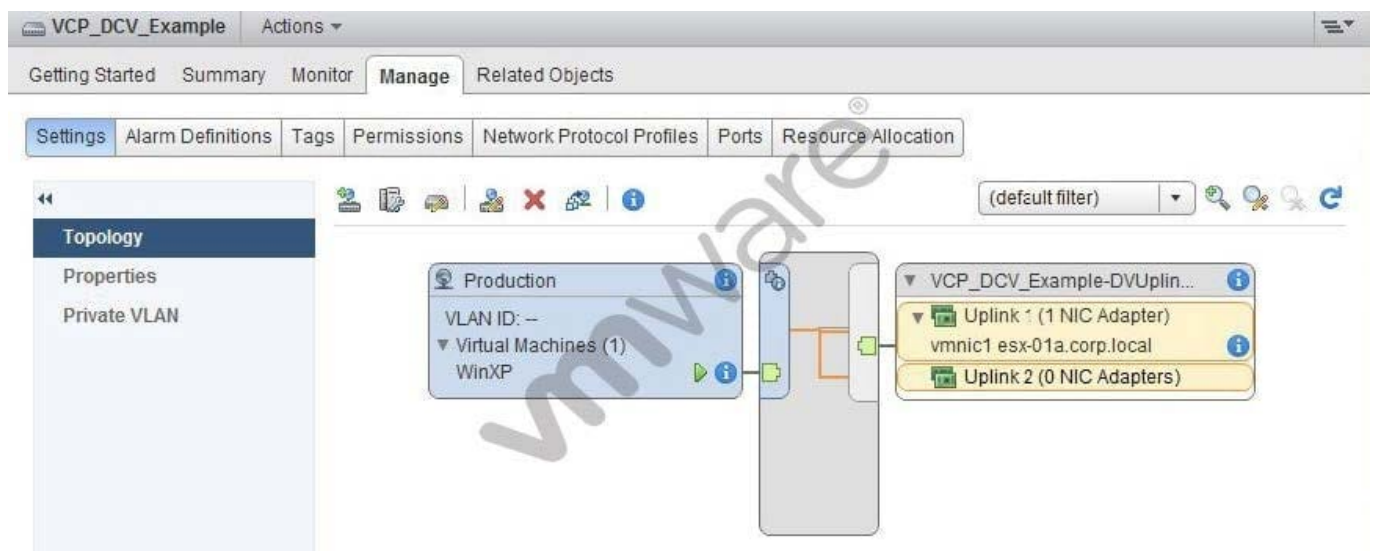

What should the vCloud Director vApp owner do to connect a vApp Network to an existing OrgVDC Network?

- A. Add the OrgVDC Network to the vApp, then migrate the vApp Network.
- B. Enable the Organization Administration controls to include the OrgVDC network.
- C. Power off the vApp, then modify the connection from the Networking tab.
- D. Add the OrgVDC Network specification to the vApp Network properties.

Correct Answer: C

### QUESTION 2

-- Exhibit --- Exhibit -

The WinXP virtual machine user reports intermittent connectivity to the corporate network. The exhibit shows the current configuration.

The configuration is as follows:

This virtual machine runs in a DRS/HA cluster of two hosts.

The VCP\_DCV\_Example vSphere Distributed Switch was recently created.

The WinXP virtual machine was recently migrated from another vSphere Distributed Switch.

The WinXP virtual machine was able to connect prior to migration to this switch.

No changes to the VCP\_DCV\_Example switch have been made since creation.

Which step should the administrator take to resolve the WinXP virtual machine's intermittent connectivity to the corporate network?

- A. Add the ESXi host to the switch where the virtual machine is currently running
- B. Disable Port Blocking on the VCP\_DCV\_Example switch
- C. Disable Port Blocking on the Production port group
- D. Enable Network I/O Control on the switch to better balance I/O

Correct Answer: A

---

### QUESTION 3

During a physical network reconfiguration, an ESXi host briefly lost connection to the management network. High Availability (HA) began powering off the virtual machines residing on the affected host to be restarted on an unaffected host in the cluster. Which setting should the administrator configure to prevent this type of HA failover during planned maintenance?

- A. Host isolation response
- B. Host monitoring
- C. VM monitoring
- D. Admission control

Correct Answer: B

---

### QUESTION 4

What is the correct order to install vCenter Server 5.1 (and newer) components?

- A. vCenter Single Sign-On, Inventory Service, vCenter Server
- B. vCenter Server, vCenter Single Sign-On, Inventory Service
- C. vCenter Server, Inventory Service, vCenter Single Sign-On
- D. vCenter Single Sign-On, vCenter Server, Inventory Service

Correct Answer: A

---

### QUESTION 5

Which three actions should an administrator take before creating a vCloud Automation Center Provisioning Group? (Choose three.)

- A. Identify the Active Directory distribution groups for the users.
- B. Determine which users will be assigned the Provisioning Group Manager role.
- C. Identify the Active Directory security groups for the users.

D. Determine which Cost Profiles will be used for the users.

E. Identify the Active Directory container for provisioned machines.

Correct Answer: BCE
