QUESTION 1

What are three reasons to choose linked clone virtual machines instead of full clones? (Choose three.)

- A. Linked clones reduce the amount of free storage space required for virtual desktops.
- B. Linked clones provision faster than full clones.
- C. Linked clones reduce the storage IOPS compared to full clones.
- D. Linked clones can be reconfigured in large batches by using recompose operations.
- E. Linked clones can be used for a broader variety of user types and use cases than full clones.

Correct Answer: ABD

QUESTION 2

An administrator is attempting to configure a new linked-clone pool to use software 3D rendering and notices that the 3D Renderer option is unavailable.

The pool settings are as follows:

Which setting change should the administrator make to allow the 3D Renderer to be enabled?

- A. Change the Default display protocol setting to RDP.
- B. Change the Allow users to choose protocol setting to No.
- C. Change the Max resolution of any one monitor setting to 2560 x 1600.
- D. Change the Max number of monitors setting to 1.

Correct Answer: B

QUESTION 3

A VMware administrator determines that a low priority virtual machine is negatively affecting the disk I/O performance of a higher priority virtual machine. The virtual machines are hosted on the same datastore presented to the same ESXi host.

Which configuration option should the VMware administrator use to resolve this issue?

- A. Increase the disk share value for the high priority VM.
- B. Migrate the low priority VM to another ESXi host.
- C. Create a Storage Profile for each priority level.
- D. Enable vSphere APIs for Array Integration (VAAI).

Correct Answer: A

QUESTION 4

An administrator needs to prevent users from removing critical components, such as the SCSI adapter from their virtual desktops.

Which setting must be configured as part of the master image to meet this requirement?

- A. In the VMX file, set devices.hotplug = "false".
- B. In the VMX file, set devices.removable = "false".
- C. In the Windows Guest OS, set HKLM\CurrentControlSet\Control\Class\Removable = 0.
- D. In the Windows Guest OS, set HKLM\CurrentControlSet\Control\DeviceClass\Removable = 0.

Correct Answer: A

QUESTION 5

A View administrator needs to ensure that an environment is ready to use Smart Cards. The cards use certificates generated by a third-party Certificate Authority (CA). The administrator has verified that each certificate contains a UPN.

What must the administrator do to complete the preparation of the environment?

- A. Import the root and intermediate CA certificates into the Trusted Root Certification Authorities group policy in Active Directory.
- B. Import the root and intermediate CA certificates into the Trusted Root Certification Authorities store on the View Connection server.
- C. Import the root and intermediate CA certificates into each user's Smart Card.
- D. Enable Smart Card Authentication in the authentication settings in View Administrator.

Correct Answer: A
