**QUESTION 1**

As part of a multisite Single Sign-On (SSO) deployment what two steps are required to ensure that a change to one Single Sign-On instance is propagated to the other instances? (Choose two.)

- A. Schedule a Replication Task on the primary instance
- B. Select the first instance during the installation of subsequent instances
- C. During the installation of each instance choose Linked-Mode
- D. Enable Synchronize to Active Directory on each instance

Correct Answer: AC

QUESTION 2

An administrator is performing the post-installation configuration of Workspace Portal. While running the setup wizard, the administrator receives an error message. The error message appears during configuration of the Directory settings and indicates that the user account cannot be found.

The administrator has confirmed the following:

What is causing the error?

- A. The user account is located below the Base DN.
- B. The user account has not been entered into the Global Catalog.
- C. The user account is located above the Base DN.
- D. The user account name is too long.

Correct Answer: C

QUESTION 3

An administrator needs to create a new pool of desktops to support a team of eight design engineers. Virtual Dedicated Graphics Acceleration (vDGA) will be used to provide hardware GPU resources. Four physical GPUs are available for direct mapping to virtual machines.

Which type of pool should the administrator create?

- A. Dedicated Assignment Automated Linked-Clone Pool
- B. Floating Assignment Automated Full-Clone Pool
- C. Floating Assignment Manual Pool
- D. Dedicated Assignment Manual Pool

Correct Answer: C

QUESTION 4

An administrator is preparing a virtual machine guest OS for a View pool deployment. A security policy requires that non-VMware View Clients must not be able to connect directly to virtual desktops using RDP.

Which configuration option should the administrator choose to meet the requirement?

- A. Set Allow users to choose protocol to No
- B. Set Default display protocol to PCoIP
- C. Set AllowDirectRDP to Disabled
- D. Set Default display protocol to RDP

Correct Answer: C

QUESTION 5

An administrator has packaged an application with ThinApp but failed to include an important update.

What should the administrator do on the capture machine to include the application update in the package?

- A. Install the update, delete the sandbox, and then use the sbmerge apply command.
- B. Delete the sandbox, install the update, and then use the sbmerge apply command.
- C. Install the update, delete the sandbox, and then use the appsync command.
- D. Delete the sandbox, install the update, and then use the appsync command.

Correct Answer: B
