QUESTION 1

Which configuration change on the physical infrastructure is required when deploying NSX?

- A. Increase the MTU size on the physical switches
- B. Enable multicast when the control plane mode is set to unicast
- C. Disable spanning tree protocol
- D. Enable IGMP snooping when the control plane mode is set to multicast

Correct Answer: A

QUESTION 2

An organization requires a high performance firewall as part of an NSX deployment. What is the minimum NSX Edge Services Gateway configuration that would be suitable for the organization's requirements?

- A. X-Large
- B. Quad-Large
- C. Large
- D. Compact

Correct Answer: B

QUESTION 3

Which option shows an advantage of implementing logical firewalls in NSX?

- A. NSX allows segmentation of virtual machines based upon VM names or user identity.
- B. NSX provides traffic forwarding between layer 2 broadcast domains.
- C. NSX allows virtual machine traffic to follow multiple paths to a specific destination.
- D. NSX provides the ability to provide IPv4 and IPv6 dual stack configuration.

Correct Answer: A

QUESTION 4

Which is not a prerequisite to upgrade vCloud Network and Security Virtual Wires to Logical Switches?

- A. vCloud Network and Security Manager has been upgraded to NSX Manager.

- B. vShield Data Security has been uninstalled.
- C. NSX Controllers have been deployed.
- D. The NSX Manager has been configured with the same IP as the vCloud Network and Security Manager.

Correct Answer: C

QUESTION 5

A company wants to deploy VMware NSX for vSphere with no PIM and no IGMP configured in the underlying physical network. This company also must ensure that non-ESXi hosts do not receive broadcast, unknown unicast or multicast (BUM) traffic.

Which replication mode should the logical switches be deployed with?

- A. Unicast Replication Mode
- B. Multicast Replication Mode
- C. Hybrid Replication Mode
- D. Transport Zone Mode

Correct Answer: A
