QUESTION 1

Which two actions should an administrator take to allow NetBackup to manage the allocation of volumes to volume pools? (Select two.)

A. define a scratch pool and add all of the volumes to it so NetBackup will move volumes to the other pools as volumes are needed

B. assign volumes to all volume pools as required in the environment

C. define a scratch pool with assigned volumes so NetBackup will move the assigned volumes to other pools as volumes are needed

D. create volume pools as required, but refrain from adding volumes to the pools

E. assign volumes to NetBackup and DataStore volume pools so NetBackup will move the assigned volumes to other pools as volumes are needed

Correct Answer: AD

QUESTION 2

Which command can an administrator execute on a NetBackup client to measure backup performance?

A. bpbkar

B. bptestnetconn

C. bpclntcmd

D. bpclient

Correct Answer: A

QUESTION 3

A NetBackup environment suffers from intermittent network outages between the MSDP Media Server and

clients during the backup window. This results in multiple backup failures.

How should an administrator overcome the backup issues?

A. enable WAN optimization

B. enable Network Resiliency

C. configure client-side deduplication

D. increase the client connect timeout

Correct Answer: B

QUESTION 4

An organization needs to have backups span between different BasicDisk storage units. The "Allow backups to span disk" setting has been enabled in Host Properties. Which additional requirement must an administrator meet to allow backups to span disks?

A. enable the "Enable standalone drive extension" setting in host properties

B. put the BasicDisk storage units in a storage unit group

C. create a disk pool with all the appropriate disk volumes

D. configure the Media Server as a Storage Server

Correct Answer: B

QUESTION 5

Which two conditions must be met to change the volume group of a tape? (Select two.)

A. backup tapes must be in the same library or standalone

B. backup tapes must have barcode labels

C. backup tapes must be unassigned

D. backup tapes must be vaulted

E. backup tapes must have the same media type

Correct Answer: AE
