QUESTION 1

Which Backup Mode forces deleted VMs to be purged from Backup Repository, when (deleted) VM Retention policy is active? (Select two)

- A. Forward Incremental - Active full
- B. Forward Incremental - Synthetic Full without transform
- C. Reverse Incremental
- D. All Forward Incremental
- E. Forward Incremental - Synthetic Full with transform

Correct Answer: AE

QUESTION 2

Which of these statements regarding Replica failover/failback are true?

- A. After committing failback, the failback protective snapshot that saves the pre-failback state of a VM replica is deleted.
- B. After committing failback, replication activities for the VM which you failed back are NOT resumed automatically.
- C. When you undo failover, the VM replica is reverted to its pre-failover state, powered off and all changes that have taken place since the VM replica was powered on are deleted.
- D. After undoing failover has completed, you will need to reconfigure the replica job before it will start again.
- E. It is only possible to failover one VM at a time.

Correct Answer: BD

QUESTION 3

What effect will changing the compressing settings for a backup job have?

- A. New compression settings are applied at the next run of the job. Previously created backup files are not affected.
- B. New compression settings are not applied until an active full backup has been performed. Previously created backup files are re-processed.
- C. New compression settings are applied at the next run of the job. Previously created backup files are re-processed.
- D. It is not possible to change compression level after first backup has been run.
- E. New compression settings are not applied until an active full backup has been performed. Previously created backup files are not affected.

Correct Answer: E

QUESTION 4

Which of these statements regarding Backup Jobs are true? (select two)

- A. If a new VM is added to a VM container after a backup job is created, the job will automatically be updated to include the added VM.
- B. During every job run, Veeam Backup and Replication checks disk space on the destination storage.
- C. It is not possible to define VM backup order.
- D. Veeam offers a free hosted SMTP server to send out e-mail notifications
- E. It is possible to manually start and complete backup job outside backup window.

Correct Answer: AB

QUESTION 5

Are credentials included in configuration backups?

- A. Yes, both username(s) and password(s) - but only if restored to same machine.
- B. Yes, both username(s) and password(s)
- C. Yes, but only username(s) are saved.
- D. No, credentials are never included.
- E. Yes, but it is optional to include password(s).

Correct Answer: C
