QUESTION 1

A Backup Administrator has to achieve minimal RPO. Which of the following setups is most appropriate?

A. Backup jobs are performed on a regular basis

B. Backup jobs run continuously

C. Each backup job serves as a source for an appropriate replication job

D. Backup jobs can be started manually at any time

Correct Answer: B

Continuous replication is more reasonable if you want to get minimal RPO (in this case each subsequent job run will start on completion of the previous job run, so the RPO will be equal to the time required to complete a job).

QUESTION 2

Which of these functionalities rely on the guest OS file system indexing?

A. Multi-OS file-level restore

B. Application-aware processing

C. Search within Veeam Backup Enterprise Manager

D. Zeroing Out Dirty Blocks

Correct Answer: B

QUESTION 3

Which statements regarding Veeam Backup and Replication tape support are true? (select two)

A. The VTF (Veeam Tape Format) proprietary format is used to write date to tape.

B. The MTF (Microsoft Tape Format) industry format is used to write date to tape.

C. Restoring a VM from tape requires first restoring the entire backup job to disk.

D. It is not possible to recover individual files/folders from tape.

E. It is possible to recover individual files/folders from tape.

Correct Answer: BC

QUESTION 4

Which Virtual Lab configurations are available when configuring recovery verification for replicas? (Choose the 3 appropriate options)

A. Basic multi-host

B. Advanced multi-host

C. Advanced single-host

D. Basic single-host

E. Basic single-network

F. Advanced multi-network

Correct Answer: BCD

QUESTION 5

Which of the following statements are true regarding Veeam Explorer for Exchange?

A. Veeam Explorer for Exchange supports Microsoft Exchange 2007, 2010 and 2013.

B. When you run the Exchange Items Restore wizard on a VM backed up using VSS, the ese.dll file is added automatically

C. Veeam Explorer for Exchange is only available for paid editions.

D. The Extensible Storage Engine DLL file can be found on the Microsoft Exchange Server distribution CD at X:\Setup\ServerRoles\Bin\ese.dll

E. Veeam Explorer for Exchange requires a special dynamic link library - ese.dll - otherwise it can only export folders/items to .PST files.

Correct Answer: D
