QUESTION 3

Are credentials included in configuration backups?

- A. Yes, both username(s) and password(s) - but only if restored to same machine.
- B. Yes, both username(s) and password(s)
- C. Yes, but only username(s) are saved.
- D. No, credentials are never included.
- E. Yes, but it is optional to include password(s).

Correct Answer: C

QUESTION 4

Is it possible to use Change Block Tracking (CBT) with Hyper-V?

- A. No, for Hyper-V hosts a proprietary filtering mechanism is used.
- B. Yes, but only for gen 2 virtual machines using VHDX.
- C. Yes, Veeam Backup and Replication installs a file system filter driver on every host.
- D. Yes, Hyper-V has built-in Change Block Tracking just like vSphere has.

Correct Answer: C

QUESTION 5

Which of the following refers to the situation when the retention is breached on a forever forward incremental backup?

- A. A new .vib file is created, no transform operation is involved.
- B. A transform operation re-builds the oldest full backup file in the chain to include changes of the incremental backup following the full backup.
- C. Veeam Backup and Replication immediately deletes the earliest increment, no transform operation is involved.
- D. Veeam Backup and Replication deletes the oldest full backup file with the following chain of increments.

Correct Answer: B
