

**Exam : 000-021**

**Title :** IBM Tivoli Workload  
Scheduler V8.5  
Implementation

**Version :** Demo

www.Pass4itSure.com

1. In an environment that includes both a Master Domain Manager (MDM) and Backup Master Domain Manger (BMDM), which two options are appropriate for the location of the database? (Choose two.)
- A. local database installed on the MDM only
  - B. live local database installed on the BMDM only
  - C. single database on a clustered machine remote from the MDM and BMDM
  - D. live database installed on a single Fault Tolerant Agent within IBM Tivoli Workload Scheduler network
  - E. live database on MDM and High Availability Disaster Recovery/Data Guard standby database on BMDM

Answer: CE

2. Which two commands are used to migrate IBM Tivoli Workload Scheduler to version 8.5 on a UNIX system? (Choose two.)
- A. launch.sh
  - B. wdinstspb
  - C. SETUP.bin
  - D. twsinst -migrate E.
  - SETUP.bin -silent

Answer: CE

3. When building the job stream MASTER#NEW\_STREAM in the composer command line, which option should be used to apply the settings in the Variable Table "LIVE\_VARS" to be associated to the jobs in the job stream?
- A. SCHEDULE MASTER#NEW\_STREAM  
VARIABLE LIVE\_VARS  
ON RUNCYCLE DAILY "FREQ=DAILY"
  - B. SCHEDULE MASTER#NEW\_STREAM  
ON RUNCYCLE DAILY "FREQ=DAILY"  
JOBVARIABLE LIVE\_VARS
  - C. SCHEDULE MASTER#NEW\_STREAM  
USE VARIABLE\_TABLE=LIVE\_VARS  
ON RUNCYCLE DAILY="FREQ=DAILY"
  - D. SCHEDULE MASTER#NEW\_STREAM  
ON RUNCYCLE DAILY="FREQ=DAILY"  
JOBVARIABLE=LIVE\_VARS

Answer: A

4. What is the correct command to stop the currently executing job "test" in JOBS job stream on a local machine?
- A. conman "k test"
  - B. conman "cj test"
  - C. conman "k jobs.test"

D. conman "cj jobs.test"

Answer: C

5. Which IBM Tivoli Workload Scheduler report will provide the job history?

- A. rep2
- B. rep3
- C. rep7
- D. rep8

Answer: C

6. In which order are job stream / job dependencies resolved?

- A. predecessor - start time - prompt - file - resource
- B. start time - prompt - predecessor - resource - file
- C. prompt - predecessor - start time - file - resource
- D. file - start time - prompt - resource - predecessor

Answer: A

7. Which report will provide information on the most recently completed plan?

- A. Report 08 - Job Histogram
- B. Report 07 - Job History Listing
- C. Report 10B - Actual Production Detail
- D. Report 11 - Planned Production Schedule

Answer: C

8. Which command is issued on an IBM Tivoli Workload Scheduler master to determine link status and collect into a user created report?

- A. netstat -rn > <filename>
- B. conman "sc" > <filename>
- C. conman "show links" > <filename>
- D. conman "disp lnk status" > <filename>

Answer: B

9. After making changes to the monitoring configuration file for the event monitoring engine on an agent, which conman command will force the change immediately?

- A. loadconf B.
- resetconf C.
- deployconf
- D. deploymonman

Answer: C

10. How can a Job with EXEC as Internal Status be stopped in the Job

Scheduling Console?

- A. select Kill from the menu
- B. select Release from the menu
- C. select Cancel Job from the menu
- D. select Cancel Pending from the menu

Answer: A

11. An IBM Tivoli Workload Scheduler administrator finds that most of the job streams are carried forward during each production day. Which action should the administrator take to ensure that only a few job streams need to be carried forward?

- A. change start of day
- B. disable the Carry Forward option
- C. cancel all job streams before start of day
- D. Administrator does not have to take any action

Answer: A

12. User "twuser" is logged on to the IBM Tivoli Workload Scheduler Master Domain Manager server using Job Scheduling Console to update calendar. The user receives a message: MODIFY on CALENDAR access not granted. What is the cause of this error?

- A. Batchman process is down.
- B. User password has expired.
- C. WebSphere security is damaged.
- D. There are insufficient permissions in Security file.

Answer: D

13. What are two circumstances for which it may be advisable to use the silent uninstallation method instead of an interactive method? (Choose two.)

- A. The Administrator is unable to successfully export DISPLAY to a remote server.
- B. IBM Tivoli Workload Scheduler is installed on a server for which there is no console access.
- C. DNS is not working properly and the server cannot be accessed remotely to run the uninstallation script.
- D. TCP on the server on which IBM Tivoli Workload Scheduler is installed is configured for half-duplex rather than full-duplex.
- E. The remote IBM Tivoli Workload Scheduler server is multi-homed, thus the return connection to IBM Tivoli Workload Scheduler cannot be established thereby requiring the use of the silent uninstaller.

Answer: AB

14. When using the Tivoli Dynamic Workload Console, which monitor tasks

are available to the user?

- A. all those that have been created by all users
- B. just those created by the user in the current session
- C. all those created by the user and shared with user's login group
- D. just those where the connection engine specifies the user's logon

Answer: C

15. Using the Tivoli Dynamic Workload Console, what are two ways to change the priority of a job? (Choose two.)

- A. Open the "Set Priority" panel from the job properties.
- B. Change the priority of the job stream that contains the job.
- C. Select the corresponding action from the Monitor jobs task panel.
- D. Open the job stream properties and drill down to the job priority panel.
- E. The priority of a job can only be changed from the Workload Designer.

Answer: AC

16. When using IBM Tivoli Monitoring Universal Agents monitors, which three IBM Tivoli Workload Scheduler processes can be monitored by default? (Choose three.)

- A. repr
- B. writer
- C. netman
- D. monman
- E. batchman
- F. appservman

Answer: CDE

17. Using Job Scheduling Console, how can the external successor chain be viewed when a job needs to be canceled?

- A. using the Hyperbolic Viewer
- B. opening the Impact view and displaying the successors
- C. opening the Job Stream Instance editor for its Job Stream Instance
- D. opening the Dependencies window and drilling down to the successors

Answer: B

18. Which Tivoli application has a predefined X-Agent available?

- A. IBM Tivoli Storage Manager
- B. IBM Tivoli Enterprise Console
- C. IBM Tivoli Configuration Manager
- D. IBM Tivoli System Automation Manager

Answer: A

19. One of the schedulers has submitted an ad hoc job to list a particular directory. Which command should be used to view the output of the ls command through IBM Tivoli Workload Scheduler?

- A. conman "sj CPU#jobs.ls;joblog"
- B. conman "sj CPU#jobs.ls;stdlist"
- C. jobman "showjoblog CPU#jobs.ls"
- D. jobman "showjoblog CPU#jobs.ls;stdlist"

Answer: B

20. What is the location for the application server scripts?

- A. wastools directory in IBM Tivoli Workload Scheduler bin directory
- B. wastools directory in IBM Tivoli Workload Automation home directory
- C. appserver directory in IBM Tivoli Workload Scheduler parent directory
- D. appserver directory in IBM Tivoli Workload Automation home directory

Answer: B
