

Exam : **000-093**

Title : IBM WebSphere Process
Server,V6.0, System Admin

Version : DEMO

www.Pass4itSure.com

1.A manager interacts with an expense application via a human task. What action is appropriate to take if an obscure exception occurs when the manager enters a response and completes the task?

- A.Edit the business data from Failed Event Manager and re-submit the failed event.
- B.Resubmit the failed event with trace using Failed Event Manager for further troubleshooting.
- C.Delete the failed event from Failed Event Manager, then stop and re-start the TaskContainer.
- D.Query the failed event using Failed Event Manager, then send the information to the developer.

Correct:B

2.The SystemOut.log indicates that the installation of an enterprise application failed. If the application contains WebSphere Adapter artifacts, what must be done before attempting to reinstall?

- A.Remove any SIBus destinations or JCA activation specifications created prior to the failure.
- B.Remove the Event Archive table created prior to the failure.
- C.Create new Endpoint Listener to replace the one existed prior to the failure.
- D.Create necessary SIBus destinations and JCA activation specifications manually.

Correct:A

3.Creation of a new profile failed with following error: Wait until the current creation or deletion operation is complete before continuing. In order to proceed with new profile creation, what must the administrator do next?

- A.Stop the server, then restart the Profile Wizard.
- B.Terminate any running javaw.exe process.
- C.Make sure to enter a unique profile name from the wizard.
- D.Delete profileRegistry.xml_LOCK file to release the lock.

Correct:D

4.An event failure occurred due to wrong date format which was sent from component A to component B. What will the Failed Event Manager allow an administrator to do?

- A.Edit the date value and resubmit
- B.Create a human task to notify the event originator
- C.Bypass component B
- D.Re-route the message

Correct:A

5.When using WebSphere Process Server V6.0.1, the installation of a business process that was generated for WebSphere Process Server V6.0.0 throws UnexpectedFailureException exception. Which of the following must the administrator do next?

- A.Regenerate business process code in V6.0.1 and reinstall.
- B.Run serviceDeploy tool to resolve this problem.
- C.Make sure that Business Process Container has been installed.
- D.Rename the module containing the business process different from the previous version.

Correct:A

6.The TaskContainer application failed to start due to missing SchedulerCalendars application. Which of the following tasks must the administrator complete to correct the situation?

- A.Reinstall Human Task Container which will reinstall the SchedulerCalendars application.
- B.Manually install the SchedulerCalendars application, which is available in \installableApps directory.
- C.Reconfigure the human task container to use Application Scheduler instead.
- D.Running bpeconfig.jacl will make SchedulerCalendars application accessible from TaskContainer

application.

Correct: B

7. The installation of a business integration application fails. The server log displays a message of the form: ... BPED0202I: Validated process model 'OrderProcess' unsuccessfully: 0 information, 2 warnings, 1 error. What should the administrator do to complete the application installation?

- A. Turn detailed tracing on and install again to capture details on the installation failure.
- B. Update the validFrom value for the OrderProcess component and reinstall.
- C. Return the application to developer to fix errors in OrderProcess.
- D. Return the application to developer to rebuild staging projects.

Correct: C

8. During the execution of a business process instance, which of the following events CANNOT be seen in the trace log if the business process container trace level is set to all=enabled?

- A. A new process instance getting created
- B. An activity instance getting created
- C. An event message delivery
- D. A staff query result

Correct: D

9. The log.txt contains INSTCONFPARTIALSUCCESS. In order to resolve the incomplete product installation, an administrator must do which two of the following?

- A. Run installver_wbi command to install missing files through the tool.
- B. Run the Installation Verification Test to detect if the error can be ignored.
- C. Verify the installed files against the bill of materials using installver_wbi command.
- D. Rename vpd.properties file, then re-run the installer.
- E. Check to see if other log files identify the errors.

Correct: C E
