**QUESTION 1**

A customer is configuring multiple LPARs and has a requirement for one of the LPARs to be able to read from the diskette drive media. How is the diskette drive assigned to an LPAR?

- A. Assign slot 1 under the CEC group 128 to the LPAR
- B. A diskette drive is automatically assigned to LPAR with Service Authority enabled
- C. Define the SCSI controller to which diskette is attached to the LPAR.
- D. Diskette drive is a common device and available to all LPARs.

Correct Answer: A

QUESTION 2

Which capability is made available by Capacity Upgrade on Demand (CUoD) installed in a POWER4 environment?

- A. To enable additional I/O
- B. To enable additional disk
- C. To enable additional processors
- D. To enable additional RIO-2 drawers

Correct Answer: C

QUESTION 3

The backup system administrator sees an entry in the error log for a disk error for an internal SCSI disk. The error log is identifying this disk at the following location code U1.9-P1/Z2-09. What is the exact location of the disk in the machine?

- A. First I/O drawer, first planar, second disk pack, second disk
- B. First I/O drawer first planar, first disk pack, first disk
- C. Second I/O drawer, first planar, second disk pack, second disk
- D. Second I/O drawer second planar, first disk pack, first disk

Correct Answer: A

QUESTION 4

Which of the following software tools can be used for load balancing between POWER4 LPAR system partitions?

- A. LoadLeveler
- B. Workload Manager
- C. Performance Agent
- D. Performance Toolbox

Correct Answer: A

QUESTION 5

The HMC has 5 user access (authority) levels, which include Operator, Advanced Operator, User Administrator, Service Representative and System Administrator. The Advanced Operator can perform which of the following tasks?

- A. Change user passwords
- B. Add and delete HMC users
- C. Delete profiles and partitions
- D. Create, activate and reset partitions

Correct Answer: D

QUESTION 6

A customer is using a B80 as a NIM server, with two 18GB disks, and 1GB of memory. When replacing this B80 with a p690 partition, what is the minimum amount of memory that can be allocated to the partition at AIX 5.2?

- A. 128 MB
- B. 256 MB
- C. 1 GB
- D. 1.5 GB

Correct Answer: B

QUESTION 7

A customer wants to install a partition using the CD-ROM in the front of the media drawer. Which of the following must be done prior to installing the partition?

- A. Assign the media drawer CEC to the partition.
- B. Assign PCI slot 12 in the media drawer to the partition.
- C. Assign the media drawer share feature of the CD-ROM to all partitions.

D. Assign the SCSI adapter attached to the front of the media drawer to the partition.

Correct Answer: D

QUESTION 8

When powering on a POWER4 LPAR system from the HMC, the "System Profile Mode" menu option displayed is grayed out and is not available. What is the most likely explanation?

- A. No SMP mode partition was created
- B. The System Profile option was not installed on the HMC
- C. No System Profile was created
- D. The wrong partition was selected when starting the partitioned system

Correct Answer: C

QUESTION 9

What should be done to change resources in an active LPAR?

- A. Modify the resource definitions while the partition is active. The changes will take effect when the partition is deactivated by AIX with a shutdown -Fr.
- B. Deactivate the partition with the AIX shutdown -F. Modify the resource definitions and activate the profile.
- C. Deactivate the partition by using a soft reset from the pull-down menu. Modify the resource definitions and activate the profile.
- D. Modify the resource definition while the partition is active. Activate the profile with the AIX shutdown -F.

Correct Answer: B

QUESTION 10

What is required for Dynamic LPAR on a POWER4 system?

- A. AIX 5L Version 5.2, Hardware Management Console, An Ethernet connection between the HMC and the primary partition on the pSeries server
- B. AIX 5L Version 5.1, Hardware Management Console, An Ethernet connection between the HMC and each active partition on the pSeries server
- C. AIX 5L Version 5.2, Hardware Management Console, A serial connection to the HMC, An Ethernet connection between the HMC and each active partition on the pSeries server
- D. AIX 5L Version 5.1, Hardware Management Console, A serial connection to the HMC, An Ethernet connection between the HMC and each active partition on the pSeries server

Correct Answer: C

QUESTION 11

If a p690 system, with large memory model, has 32 CPUs, 256GB of memory, and six drawers, how many LPARs can be created using 16GB of memory per LPAR?

- A. 8
- B. 12
- C. 14
- D. 16

Correct Answer: C

QUESTION 12

When deleting a partition profile, which of the following statements is true?

- A. A profile can only be deleted when the partition is in the Ready state.
- B. A profile can only be deleted when it is not a default profile.
- C. Multiple profiles cannot be deleted at one time if they belong to the same partition.
- D. Profiles cannot be deleted if they are part of the system profile.

Correct Answer: B
