

# 100% Money Back Guarantee

**Vendor:** IBM

**Exam Code:** 000-422

**Exam Name:** InfoSphere QualityStage v8.5

**Version:** Demo

# 100% Money Back Guarantee

## QUESTION NO: 1

You added a new field to matching fields of an existing match specification and provisioned all match specification components. Then you ran the job but it failed immediately. The input data size is 2G bytes and the job worked without any issues before you modified. Which one is most likely the cause of the problem?

- A. Lack of physical memory.
- B. Lack of scratch disk space.
- C. The job needs to be re-compiled.
- D. The frequency file needs to be re-generated.

**Answer: D**

## QUESTION NO: 2

What are the two output fields provided by the COUNTRY rule set? (Choose two)

- A. Verified flag field
- B. ISO country code field
- C. ISO country name field
- D. Explicit or default flag field
- E. Rejected address reason code

**Answer: B,D**

## QUESTION NO: 3

The output fields available for mapping from the Standardize stage can be classified into three different categories. What are two of these categories? (Choose two)

- A. Reject fields
- B. Matching fields
- C. Duplicate fields
- D. Database fields
- E. Business Intelligence fields

**Answer: B,E**

**QUESTION NO: 4**

What input pattern does the following address produce when standardized by the USADDR rule set? 21 Wingate St Apt 601

- A. ^?SU^
- B. ^+T^U
- C. ^+TU^
- D. <+S+U

**Answer: C**

**QUESTION NO: 5**

Which of the following removes anomalies within the data after the process has determined the proper domain and parsed the data?

- A. Address Matching
- B. Address Verification
- C. Address Certification
- D. Address Standardization

**Answer: D**

**QUESTION NO: 6**

In the output fields available from the Standardize stage, which two of the following reporting fields are produced from the Standardize stage processing? (Choose two)

- A. Input pattern
- B. Dropped data
- C. Filter condition
- D. Rule set name
- E. Unhandled pattern

**Answer: A,E**

**QUESTION NO: 7**

What is one of the the uses of a pre-processor rule set in standardizing your data?

- A. Prepares the data for processing by the investigate stage
- B. Prepares the data for processing by domain specific rule sets
- C. Rejects the data to a separate link so your job does not need to process bad data
- D. Rejects the data to a separate link so domain specific rule sets will ignore unnecessary data

**Answer: B**

**QUESTION NO: 8**

What stage ensures that each data element has a consistent representation and format?

- A. Match
- B. Survive
- C. Investigate
- D. Standardize

**Answer: D**

**QUESTION NO: 9**

Which of the following data problems can be addressed by QualityStage Standardization?

- A. Wrong data.

- B. Missing data.
- C. Misspelled data.
- D. Miscalculated data.

**Answer: C**

**QUESTION NO: 10**

Which two statements describe steps in the Data Quality methodology? (Choose two)

- A. End user data entry.
- B. Evaluation of results.
- C. Analyze the Source data.
- D. Address Certification application.
- E. Data Management Implementation.

**Answer: B,C**

**QUESTION NO: 11**

Which two steps in Data Quality Methodology often facilitates effective matching? (Choose two)

- A. Parsing
- B. Surviving
- C. Data Mapping
- D. Standardization
- E. Token Selection

**Answer: A,D**

**QUESTION NO: 12**

You are using Word Investigation with one of the product provided address rule sets to investigate a business address field called BUSINESS\_ADDRESS. Which two of the following will the pattern report show you in regards to the BUSINESS\_ADDRESS field? (Choose two)

- A. Address type
- B. Token Counts
- C. Pattern Counts
- D. Valid Addresses
- E. Sample of fields values

**Answer: C,E**

**QUESTION NO: 13**

Which two report types are generated by a Word Investigation? (Choose two)

- A. Token
- B. Pattern
- C. Analysis
- D. Statistical
- E. Word List

**Answer: A,B**

**QUESTION NO: 14**

If there are a large number of "@" and "?" symbols in a standardization pattern report, which report will assist with improving classifications?

- A. Run Word investigation with Advanced options.
- B. Run the Character Discrete report on all columns.
- C. Run the Character Discrete report on all unhandled patterns.
- D. Run Character Concatenate investigation on selected columns.

**Answer: A**

**QUESTION NO: 15**

In order to run Word investigations on Latin and Chinese data columns, what two tasks are required? (Choose two)

- A. Use Chinese ruleset for Chinese data.
- B. Use NLS map Shift\_CN in job properties.
- C. Install Information Server with NLS option.
- D. Set QualityStage client codepage to hinese".Set QualityStage client codepage to ?hinese".
- E. Specify UTF16 as the default character set for the Information Server.

**Answer: A,C**

**QUESTION NO: 16**

You are looking to modify the USADDR address rule set for your companies QualityStage data cleansing application. How can the word investigation reports be used to help in the task of modifying the rule set?

- A. Add tokens to allow more duplicates to be identified
- B. Correct spelling errors in the reported address fields data
- C. Identify new tokens to allow additional address words to be classified
- D. Identify new matches to get additional address words to be used in match designer

**Answer: C**

**QUESTION NO: 17**
