

100% Money Back Guarantee

Vendor: IBM

Exam Code: 000-842

Exam Name: Rational Functional Tester for Java

Version: Demo

100% Money Back Guarantee

Question: 1

Which statement is true about the "Time Delayed" method when you are creating verification points in your scripts?

- A - It introduces a fixed delay after a previous action before the verification point is tested
- B - It allows a verification point to keep trying until the time specified has elapsed
- C - It gives the tester time to reveal pop-up objects (such as menus) during the creation of a verification point
- D - It gives the tester the opportunity to specify a delay after a verification point fails

Answer: C

Question: 2

Given the following manual verification point

```
vpManual ("manual1", "The rain in Spain", "The Rain in Spain").performTest();
```

What are the results?

- A - The two strings are the same, and a pass would be generated in the log
- B - The two strings are different, and a fail would be generated in the log
- C - The syntax is incorrect, so this would not compile
- D - This will compile but the parameters are mixed up, and a fail would be recorded in the log.
The correct syntax is: vpManual ("The rain in Spain", "The Rain in Spain", "manual1").performTest();

Answer: B

Question: 3

Which branches under Preferences contain specific settings to enable the ClearCase integration?

- A - Workbench and Test
- B - Functional Test and Run/Debug
- C - Workbench and Team
- D - Plug-in Development and Functional Test

Answer: C

Question: 4

When you set break points, why does the script not stop at the break points and switch over to the debug perspective?

- A - This is a known eclipse bug in version 6.1 and has been corrected in the latest release or last interim fix
- B - The break point has already been recognized by the JVM and the break point needs to be toggled
- C - Either the icon or debug functional tester script was not invoked or the shift + F11 menu option was not invoked
- D - The debug perspective is not listed as an available perspective when trying to debug a script

Answer: C

Question: 5

When you enable web browsers, what is the best way to select the Linux or UNIX web browser?

- A - You use the Search button, choose Search All, select the executable, and provide all the needed parameters.
- B - Modify the registry to enable Linux or Unix web browser support
- C - Modify the Internet Explorer settings to refer to a Linux or Unix web browser
- D - You use the Search button, choose Search In, browse to the executable, and provide all the needed parameters

Answer: D

Question: 6

In which situation is it best to use the Browser Enablement Diagnostic tool?

- A - when the web browser does not launch when invoked through Functional Tester
- B - when testers are trying to determine if their web browsers are compatible with Functional Tester
- C - when Functional Tester is in the recording process and no HTML objects are being recognized
- D - when Functional Tester is not able to launch the viewlet comparator on the HTML log

Answer: C

Question: 7

You cannot access help file from Rational Functional Tester. You receive an error or the page loads slowly. How can this be fixed?

- A - talk to the LAN Administrator to see if there is a problem with the corporate network or if the ISP is having performance issues
- B - in Network properties, change the IP configuration to static IP and provide a valid IP address, which can be obtained from the LAN Administrator
- C - in the Network Advanced settings for proxies, remove "127.0.0.1; localhost" from the Exceptions if these addresses are listed
- D - if your host was configured to use DHCP for IP assignment, make sure that the "Automatically detect settings" checkbox is cleared

Answer: D

Question: 8

Where do you set the option for switching to Test Debug perspective when debugging?

- A - Preferences > Functional Test > Workbench > Advanced
- B - Preferences > Java > Debug
- C - Preferences > Run/Debug > Console
- D - Preferences > Test

Answer: A

Question: 9

How do you add line numbers within the script editors view?

- A - use a third party plug-in because this option is not available within the tools interface
- B - download the latest version of the plug-in
- C - select the option under the main menu > Window > Preferences > Debug
- D - select the option under the main menu > Window > Preferences > Editor

Answer: D

Question: 10

How many default Java environments can you have within one configuration of Rational Functional Tester?

- A - one for each instance of the application under test
- B - as many default Java environments as are needed to do testing
- C - You can change the java environments dynamically when testing different applications.
- D - only one

Answer: D

Question: 11

What is the best practice when changing object maps that are already assigned to Functional Test projects?

- A - highlight the project in the Functional Test projects, right-click, select Properties > Functional Test project and browse to the new object map
- B - record a new script, select the new Functional Test project, click next and browse to the new test object map
- C - modify the XML file, configurations.rftcfg, locate the object map section, enter the proper object and save the XML file
- D - right-click the test object map in the script explorer, choose the Open option and make necessary changes

Answer: A
