

Exam : 000-890

**Title : IBM Tivoli Monitoring V6.1
Implementation**

Version : DEMO

www.Pass4itSure.com

1.By updating the Tivoli Enterprise Console (TEC) Server mapping file, what can you control for a given situation? (Choose two.)

- A.Msg slot value
- B.Master_reset_flag value
- C.Situation_displayitem value
- D.Severity of the situation event
- E.TEC Event Server and port number to receive the situation event

Correct: D E

2.Summarization settings can be configured for which time periods? (Choose three.)

- A.Yearly
- B.Hourly
- C.Minutes
- D.Seconds
- E.Quarterly
- F.Semi-annually

Correct: A B E

3.What is an enumerated attribute? A.an attribute with a threshold configured B.an attribute with a calculated set of values C.an attribute with a predefined set of values D.an attribute that has been used to create a view

Correct: C

4.Which two commands can be used to place products into the depot? (Choose two.)

- A.install.sh
- B.tacmd addSystem
- C.tacmd addBundles
- D.itmcmd addSystem
- E.itmcmd addBundles

Correct: A C

5.An OMEGAMON agent is connected to the IBM Tivoli Monitoring V6.1 (ITM) Tivoli Enterprise Monitoring Server. You can see it in the Tivoli Enterprise Portal Server (TEPS), however, in the TEPS the views, situations and other data are missing. What step needs to be accomplished to correct this?

- A.Restart the TEPS to pick up the new managed systems.
- B.Grant the user authority to view the OMEGAMON agents.
- C.Install the OMEGAMON application support to the TEMS and TEPS.
- D.The OMEGAMON agents are not supported in the ITM V6.1 environment.

Correct: C

6.When configuring the Summarization and Pruning agent, what is the minimum time interval that must elapse between iterations of the agent?

- A.1 day
- B.1 hour
- C.1 week
- D.1 minute

Correct:A

7.Where are simple situations evaluated?

- A.agent
- B.Tivoli Enterprise Portal Server
- C.Tivoli Enterprise Monitoring Server
- D.no evaluation is done in simple situations

Correct:A

8.The Solution Design documentation dictates that TCP/IP should be the protocol used for the Tivoli Enterprise Management Server. Which communication protocol should be selected during the configuration?

- A.IP.TCP
- B.IP.PIPE
- C.IP.SPIPE
- D.IP.TCPV4

Correct:B

9.Which two permissions must a user ID have to distribute, assign and associate situations? (Choose two.)

- A.View
- B.Modify
- C.Remove
- D.Associate
- E.Distribute

Correct:A B

10.What is the purpose of the Specify Optional Primary Network pane in the Linux or UNIX Manage Tivoli Enterprise Monitoring Services Agent Configuration panel?

- A.Used by the agent to specify the host name of the secondary Tivoli Enterprise Monitoring Server (TEMS).
- B.Used to specify to which NIC adapter to bind the agent communication.
- C.Used by firewall support to specify the NIC adapter used for communication.
- D.Used to identify which specific TEMS the agent is being configured to communicate.

Correct:B

11.In a typical customer deployment that contains 3500 OS agents, what would be the typical number of hub and remote Tivoli Enterprise Monitoring Server (TEMS) required?

- A.one hub TEMS and five remote TEMS
- B.Two hub TEMS and two remote TEMS
- C.Three hub TEMS and one remote TEMS
- D.One hub TEMS and seven remote TEMS

Correct:D

12.After successfully configuring the seeding of data for a Windows endpoint, what would help verify that the IBM Tivoli Monitoring V 5.x engine is correctly configured?

- A.Look for the endpoint label in the wdmcollect all output.
- B.Look for the endpoint label in the wlookup or DataSeeding output.
- C.Look for the string DataSeeding= in the file \$LCF_DATDIR/LCFNEW/Tmw2k/Tmw2k.log.
- D.Look for the string DataSeeding= in the file \$LCF_DATDIR/LCFNEW/Tmw2k/bin/tmw2k.conf.

Correct:D

13.If you do not currently have the Candle Management Workstation and you are installing OMEGAMON XE for CICS 3.1.0 into an IBM Tivoli Management environment, What must be installed for complete operability?

- A.Candle Management Workstation Agent
- B.Candle Management Workstation Product
- C.Candle Management Workstation that shipped with OMEGAMON XE 3.1.0
- D.Candle Management Workstation that shipped with IBM Tivoli Monitoring V6.1

Correct:C

14.Given a Windows Tivoli Enterprise Portal Server (TEPS) how do you verify the ODBC entry for the TEPS is valid?

- A.Run install_dir\CNPS\bin\kfwodbc.exe -p .
- B.Open Manage Tivoli Enterprise Services, right-click the TEPS, select Advanced, select Test Database Connection.
- C.Open the ODBC Data Source Administrator, select User DSN, select the TEPS2 entry, click Configure, enter the database user ID and password and click Connect.
- D.Open the ODBC Data Source Administrator, select System DSN, select the TEPS2 entry, click Configure, enter the database user ID and password and click Connect.

Correct:D

15.Which action would be appropriate to take to determine why no historical data can be displayed in the Tivoli Enterprise Portal?

- A.Check to see if the Warehouse Proxy agent is running.
- B.Check to see if the user has authority to view only real-time data and not historical data.
- C.Check to see if the Tivoli Enterprise Monitoring Server timeout value needs to be increased.
- D.Check to see that the Use Java version 1.4.2 for «applet» (requires restart) check box has been cleared in the Internet Explorer browser toolbar, Tools --> Internet Options Advanced --> Java (IBM).

Correct:A

16.When uninstalling the Warehouse Proxy, what is the following DB2 command used for? UNCATALOG SYSTEM ODBC DATA SOURCE

- A.to remove the DB2 data source
- B.to remove the ODBC connection on UNIX
- C.to remove the ODBC connector on Windows
- D.to prepare the data warehouse database prior to a reinstallation

Correct:A

17.How do you ensure that a user is defined to the Tivoli Enterprise Portal Server (TEPS)?

- A.On a Linux TEPS, check that the user is defined in /etc/passwd.
- B.Check that the user is defined to the LDAP server being used by the TEPS.
- C.On a Windows TEPS, check that the user is defined to the operating system.
- D.Select Administer Users in the TEPS main menu bar and validate that the user ID exists.

Correct:D

18.When configuring the Warehouse Proxy agent and corresponding ODBC connection, what two things will the user be prompted for? (Choose two.)

- A.collection interval
- B.data source name

- C.warehouse interval
- D.database administrator user ID and password
- E.schedule for how often the Warehouse Proxy should run

Correct: B D

19. When creating a new situation, which two naming conventions are correct? (Choose two.)

- A.the name must be unique
- B.the name must be 31 characters or less
- C.the name can start with a numeric value (0-9)
- D.the name may not end with a numeric character
- E.the name may not contain any numeric (0-9) or underscore (_) characters

Correct: A B

20. Your existing Tivoli Distributed Monitoring V3.7 environment needs to be upgraded to IBM Tivoli Monitoring V6.1. What upgrade infrastructure information is obtained by running the commands wlookup Lr Gateway and wep ls ? (Choose two.)

- A.just endpoint labels
- B.the status of the gateway
- C.the name of the gateways
- D.the interpreters of the endpoint
- E.endpoints belonging to this gateway

Correct: C E
