**QUESTION 1**

\_\_\_\_\_ involves gathering pieces of information and drawing a conclusion, whose sensitivity exceeds any of the individual pieces of information.

- A. Inference
- B. Social engineering
- C. Movement analysis
- D. Communication-pattern analysis
- E. Aggregation

Correct Answer: E

---

**QUESTION 2**

A(n) \_\_\_\_\_ is a one-way mathematical function that maps variable values into smaller values of a fixed length.

- A. Symmetric key
- B. Algorithm
- C. Back door
- D. Hash function
- E. Integrity

Correct Answer: D

---

**QUESTION 3**

Which type of access management allows subjects to control some access of objects for other subjects?

- A. Discretionary
- B. Hybrid
- C. Mandatory
- D. Role-based
- E. Nondiscretionary

Correct Answer: A

---

**QUESTION 4**

Which of the following is an integrity requirement for Remote Offices/Branch Offices (ROBOs)?

- A. Private data must remain internal to an organization.
- B. Data must be consistent between ROBO sites and headquarters.
- C. Users must be educated about appropriate security policies.
- D. Improvised solutions must provide the level of protection required.
- E. Data must remain available to all remote offices.

Correct Answer: B

---

**QUESTION 5**

Which of these metrics measure how a biometric device performs, when attempting to authenticate subjects? (Choose THREE.)

- A. False Rejection Rate
- B. User Acceptance Rate
- C. Crossover Error Rate
- D. False Acceptance Rate
- E. Enrollment Failure Rate

Correct Answer: ACD

---

**QUESTION 6**

\_\_\_\_\_ are the people who consume, manipulate, and produce information assets.

- A. Information asset owners
- B. Business-unit owners
- C. Audit-control groups
- D. Information custodians
- E. Functional users

Correct Answer: E

---

**QUESTION 7**

A(n) \_\_\_\_\_ is an abstract machine, which mediates all access subjects have to objects.

- A. ACL
- B. Reference monitor
- C. State machine
- D. TCB
- E. Router

Correct Answer: B

---

### QUESTION 8

To comply with the secure design principle of fail-safe defaults, what must a system do if it receives an instruction it does not understand? The system should:

- A. send the instruction to a peer server, to see if the peer can execute.
- B. not attempt to execute the instruction.
- C. close the connection, and refuse all further traffic from the originator.
- D. not launch its debugging features, and attempt to resolve the instruction.
- E. search for a close match in the instruction set it understands.

Correct Answer: B

---

### QUESTION 9

What is single sign-on? An authentication method:

- A. that allows users to authenticate once, and then uses tokens or other credentials to manage subsequent authentication attempts
- B. that stores user credentials locally, so that users need only authenticate the first time, a local machine is used
- C. requiring the use of one-time passwords, so users authenticate only once, with a given set of credentials.
- D. that uses smart cards, hardware tokens, and biometrics to authenticate users; also known as three-factor authentication
- E. that requires users to re-authenticate for every resource accessed

Correct Answer: A

---

### QUESTION 10

Which of the following is likely in a small-business environment?

- A. Most small businesses employ a full-time information-technology staff.
- B. Resources are available as needed.
- C. Small businesses have security personnel on staff.
- D. Most employees have experience with information security.
- E. Security budgets are very small.

Correct Answer: E

---

#### QUESTION 11

Which type of Business Continuity Plan (BCP) test involves practicing aspects of the BCP, without actually interrupting operations or bringing an alternate site on-line?

- A. Structured walkthrough
- B. Checklist
- C. Simulation
- D. Full interruption
- E. Parallel

Correct Answer: C

---

#### QUESTION 12

You are preparing a machine that will be used as a dedicated Web server. Which of the following services should NOT be removed?

- A. E. IRC
- B. SMTP
- C. FTP
- D. HTTP
- E. PVP

Correct Answer: D

---

#### QUESTION 13

Public servers are typically placed in the \_\_\_\_\_, to enhance security.

- A. Restricted Entry Zone
- B. Open Zone
- C. Internet Zone
- D. Demilitarized Zone
- E. Public Entry Zone

Correct Answer: D

---

#### QUESTION 14

Which of the following best describes an external intrusion attempt on a local-area network (LAN)?

- A. Internal users try to gain unauthorized access to information assets outside the organizational perimeter.
- B. External-intrusion attempts from sources outside the LAN are not granted permissions or rights to an organization's information assets.
- C. External users attempt to access public resources.
- D. External intruders attempt exploitation of vulnerabilities, to remove their own access.
- E. Internal users perform inappropriate acts on assets to which they have been given rights or permissions.

Correct Answer: B

---

#### QUESTION 15

Which of the following are common failures that should be addressed in an organization's Business Continuity Plan (BCP) ? (Choose THREE.)

- A. Connectivity failures
- B. Accounting failures
- C. Hardware failures
- D. Utility failures
- E. Personal failures

Correct Answer: ACD
