QUESTION 1

How many frames per second make up a NTSC and PAL video signal?

- A. NTSC 20
- B. NTSC 25
- C. NTSC 30
- D. PAL 25
- E. PAL 30

Correct Answer: CD

QUESTION 2

A popular way to select a Gateway is by using a

- A. Gateway SPID values registered on a Gatekeeper for ISDN to IP.
- B. Gateway Prefix values registered on a Gatekeeper for IP to ISDN.
- C. Direct In Dial Numbers of ISDN to IP with or without a Gatekeeper.
- D. Set of numbers that point to the TEI of the D-Channel.
- E. A and B
- F. B and C
- G. C and D

Correct Answer: F

QUESTION 3

Videoconferencing over IP End Point Systems must use signalling to establish a media channel conference Call Setup. Call Operations are part of what Standard?

- A. LAP / B
- B. LAP / D
- C. H.225/Q.921
- D. H.225/H.261
- E. H.225/Q.931

Correct Answer: E

QUESTION 4

Media Gateways will:

- A. process information for Video File Transfers.
- B. process audio for Multipoint Conferencing.
- C. provide Bearer to Bearer Channel Switching.
- D. provide Bearer Channel termination and Media Stream termination and conversion.
- E. terminate Packet Networks.

Correct Answer: D

QUESTION 5

H.239 Standard is best described as:

- A. Audio Coding and Additional Media Channels.
- B. Role Management and Additional Far End Camera Control.
- C. Role Management and Chair Control.
- D. Role Management or People and Content Standard for H.300 Series.
- E. Role Management -People and Content Standard for H.321 only.
- F. Role Management -People and Content Standard for H.320 only.

Correct Answer: D

QUESTION 6

G.723.1 uses which bit rates?

- A. 5.3 and 6.3 kilobits per second
- B. 5.3 and 6.3 kilobytes per second
- C. 8 and 16 kilobits per second
- D. 8 and 16 kilobytes per second
- E. 12 and 24 kilobits per second

Correct Answer: A

QUESTION 7

The scope of H.225 Standard describes:

- A. video and audio coders for H.323.
- B. channel bandwidth sub-division.
- C. the means by which audio, video, data, and control are associated, coded, and packetized for transport between H.323 equipment on a packet-based network.
- D. the means by which audio, video, data, and control are associated, coded, and channelized for transport between H.320 equipment on a channel network.
- E. the Coding Operation details for video and audio.
- F. A and C

Correct Answer: C

QUESTION 8

Channel Network Clocks are used to provide the timing source for what kind of data?

- A. Transmit
- B. Receive
- C. Old
- D. Discarded
- E. A and D
- F. A and B

Correct Answer: F

QUESTION 9

Which of the following is the most important component of H.221 connectivity?

- A. Video Intra Frames Signals and Data Collaboration Signals
- B. Frame Alignment Signal and Bit Rate Allocation Signal
- C. Encryption Control Signal and Video Conference Signal
- D. Audio Signals and Data Collaboration Signals

Correct Answer: B

QUESTION 10

Which of the following accurately describes room gain as it applies to acoustic echo cancellation?

- A. Measure of amplifier power driving the loudspeakers in a given conference room
- B. Ratio of loudness of the participants voices versus the loudspeaker volume arriving at the microphone
- C. Relative sensitivity of the microphones expressed in dB versus the same microphone in a "free field" environment
- D. Relative perceived loudness of a person speaking in a given room versus the same person speaking in an anechoic chamber

Correct Answer: B

QUESTION 11

Muting an audio during a connected videoconference is typically performed when you:

- A. need to move the microphone.
- B. do not want to hear the other parties.
- C. need to move conference table.
- D. are listening and your room is very noisy.
- E. need to hang up the video call.

Correct Answer: ACD

QUESTION 12

Which of the following describes the activity for which a RTCP is used?

- A. Transport Task for Communication of Audio and Video over IP
- B. Transport Task of Simple Network Management Protocol
- C. Network Statistics of Media Channels between Videoconferencing Hardware
- D. Network Statistics of Media Channels between Routers
- E. Network Statistics of Media Channels between Gatekeepers

Correct Answer: C

QUESTION 13

Using different color-temperature light sources will compromise which part of the camera performance?

- A. Brightness
- B. White Balance
- C. Field of View
- D. PTZ

Correct Answer: B

QUESTION 14

H.241 is best described as a standard that unifies:

- A. Audio Coding for H.300 Series.
- B. Framing for H.300 Series.
- C. Video Conference Coding for H.300 Series.
- D. all Operations for H.300 Series.
- E. Video Procedures and Control Signals for H.300 Series.

Correct Answer: E

QUESTION 15

Videoconference rate of a H.323 IP Call requires the packet examination of which of the following?

- A. Medium Access Control Layer
- B. IP Header
- C. UDP Header
- D. TCP Layer
- E. Packet Payload
- F. Gatekeeper Registration Request
- G. RTP Header

Correct Answer: E
