**QUESTION 1**

A Citrix Engineer needs to update the version of Citrix Receiver for Windows provided by Citrix StoreFront. Which files should the engineer update?

- A. Citrix Receiver files on the Delivery Controller
- B. Citrix Receiver files in C:\inetpub\wwwroot\Citrix\store
- C. Citrix Receiver files for every host in the machine catalog
- D. Citrix Receiver files in C:\Program Files\Citrix\Receiver StoreFront\Receiver Clients\Windows

Correct Answer: D

QUESTION 2

A Citrix Engineer at CCH needs to give an administrator located in another office the ability to manage policies and applications. Which administrative role should be granted to the administrator?

- A. Host Administrator
- B. Delivery Administrator
- C. Help Desk Administrator
- D. Machine Catalog Administrator

Correct Answer: B

QUESTION 3

Users who are testing the hosted shared desktop at CCH report that logon time is unacceptably slow. Which three best practices should a Citrix Engineer implement to optimize the logon time for the hosted shared desktops? (Choose three.)

- A. Enable Profile Streaming.
- B. Enable Active Write Back.
- C. Store the UPM profiles on a highly available CIFS share.
- D. Replace logon scripts with GPO preferences where possible.
- E. Redirect common folders such as Documents, Music, and Pictures.

Correct Answer: ADE

QUESTION 4

To reuse a previously assigned Remote PC Access system, which command will remove the assigned user from the Virtual Delivery Agent?

- A. Remove-UserProfileShare -Path \$path
- B. Remove-BrokerUser -Machine \$machine
- C. Remove-XDUser -DesktopName \$desktopname
- D. Remove-BrokerUser -DesktopGroup \$username

Correct Answer: B

QUESTION 5

Scenario: A Citrix Engineer created dedicated desktops for managers, doctors, and HR. Doctors accessing their desktops have the ability to copy and paste between their local PC and the dedicated desktop, even though company policy dictates that only managers should be granted this ability. The engineer needs to implement a solution that prevents the doctors from using the clipboard, while also enabling the HR users to print.

The engineer inspects the configured policies and observes a Management policy filtered on the Management Users Active Directory group, a Doctors policy filtered on the Doctors Active Directory group, and an HR policy filtered on the HR Active Directory group.

The policies and settings are as follows:

Policy A - Management - Client Clipboard redirection: Allowed

Policy B - Doctors - Client Clipboard redirection: Allowed

Policy C - HR - No settings configured

Policy D - Unfiltered - Client Clipboard redirection: Prohibited. Client Printer Redirection: Allowed. Auto-create all client printers: Allowed

How should the engineer prioritize the policies? (The policies below are listed in order of priority from highest (left) to lowest (right).)

- A. Policy A, Policy B, Policy D, Policy C
- B. Policy A, Policy D, Policy C, Policy B
- C. Policy C, Policy A, Policy B, Policy D
- D. Policy B, Policy C, Policy A, Policy D

Correct Answer: B

QUESTION 6

Scenario: A Citrix Engineer needs to deploy XenDesktop to deliver a pool of 100 virtual desktops to users. The engineer needs to maintain a single shared image for all 100 virtual desktops. The engineer also needs to ensure that users assigned to these pooled desktops have the capability to customize their desktops and to install applications

permanently. Additionally, the storage platform does NOT have thin-provisioning capabilities.

Which two technologies should the engineer implement to meet the above requirements? (Choose two.)

- A. Personal vDisk
- B. Remote PC Access
- C. Provisioning Services
- D. Citrix Profile Management
- E. Machine Creation Services

Correct Answer: AC

QUESTION 7

CCH requires that every Change at Site configuration is documented for auditing and needs to prevent undocumented changes to the Site configuration.

Which two actions should a Citrix Engineer perform to meet these requirements? (Choose two.)

- A. Ensure that Configuration logging is enabled.
- B. Configure logging for the Site database on the SQL Server.
- C. Enable Windows Security Settings - Audit Policy using Group Policy.
- D. Disable the '\\Allow changes when the database is disconnected\\' option on the Configuration database.

Correct Answer: AD

QUESTION 8

Scenario: Two servers need to be added to a XenServer resource pool. The Procurement department is only able to place an order for the newer generation servers.

What are three necessary considerations when adding the hosts to the current pool? (Choose three.)

- A. The servers need to have the same amount of RAM.
- B. CPUs need to be from the same vendor as the existing CPUs.
- C. Servers need to be from the same vendor as the existing servers.
- D. The features of the older CPU must be a subset of the newer CPU.
- E. The CPU of the new server must have Intel or AMD Migration support.

Correct Answer: BDE

**QUESTION 9**

Scenario: The Citrix StoreFront Receiver for Web is configured at URL <https://vm020201.company.com>. To make the URL easier to remember, the Citrix Engineer wants to make the Site internally accessible at <https://myapps>.

Which action could the engineer take to achieve this?

- A. Create a second virtual host named myapps and import the SSL Certificate and SSL Key from vm020201.
- B. Create a CNAME DNS Record for myapps and verify that myapps is included in the SSL Certificate Common Name.
- C. Create a new SRV Record pointing to the IP address of vm020201 and verify that myapps is included in the SSL Certificate Common Name.
- D. Create a PTR Record for myapps pointing to vm020201 at reverse lookup zone and verify that myapps is included in the SSL Certificate Common Name.

Correct Answer: B

QUESTION 10

Which two commands could a Citrix Engineer use to troubleshoot licensing related issues when deploying a Delivery Controller? (Choose two.)

- A. `Imdiag -c`
- B. `Imdown -c`
- C. `Imhostid -ether`
- D. `Imhostid -hostname`

Correct Answer: AD

QUESTION 11

Scenario: A Citrix Engineer has configured external access to Citrix StoreFront through NetScaler and a corresponding store on the StoreFront servers with user validation on NetScaler. When testing the external access, the engineer is able to log on, but receives this error message:

Access is denied due to invalid credentials.

The engineer validates that root SSL certificates are in place both on NetScaler and the StoreFront server.

Which configuration step should the engineer take to solve this issue?

- A. Configure STA server entries on the NetScaler virtual server.
- B. Upgrade firmware on the NetScaler to at least version 10 build 69.4.
- C. Enable the `'Request tickets from two STAs'` option when creating the store.
- D. Add the NetScaler VIP and external access URL to the hosts file on the StoreFront servers.

Correct Answer: D

QUESTION 12

Scenario: A Citrix Engineer needs to deploy static desktops with Personal vDisk for the head office staff. The engineer implements a catalog named Windows8-PvD with Personal vDisk enabled and uses Citrix Roaming Profile Management to save user profile settings.

The engineer needs to configure Personal vDisk to NOT store user profile settings. Additionally, Personal vDisk must be configured so that 80% is allocated for applications and 20% is allocated for user profile data.

Which two steps must the engineer take to implement this solution? (Choose two.)

- A. Configure the registry key PercentOfPvDForApps on the master image with a value of 80.
- B. Configure the registry key EnableUserProfileRedirection on the master image with a value of 0.
- C. Run "Set-BrokerDesktopGroup "Windows8-PvD" -PeakBufferSizePercent 80" on the Delivery Controller.
- D. Configure the registry key EnableDynamicResizeOfAppContainer on the master image with a value of 1.
- E. Run "Set-BrokerDesktopGroup "Windows8-PvD" -OffPeakBufferSizePercent 20" on the Delivery Controller.

Correct Answer: AB

QUESTION 13

Scenario: A Citrix Engineer has updated the XenDesktop master image, which the head office users connect to in order to use Personal vDisk. When testing the new image, the engineer discovers that the Personal vDisk feature stopped working.

What could the engineer do to prevent this issue from occurring during future updates?

- A. Ensure that the Update Inventory process is NOT interrupted.
- B. Ensure the master image and Personal vDisk are on the same storage type.
- C. Ensure that neither updates nor applications are placing binaries in the administrator user profile.
- D. Ensure that the installed data on the Personal vDisk does NOT exceed more than 50% of the vDisk size.

Correct Answer: A

QUESTION 14

A user logs on to a Citrix StoreFront store through NetScaler and launches a virtual desktop.

What is the communication flow between Citrix Receiver and the Virtual Delivery Agent once the user is logged on to the virtual desktop?

- A. Citrix Receiver -> Virtual Delivery Agent

- B. Citrix Receiver -> NetScaler -> Virtual Delivery Agent
- C. Citrix Receiver -> Delivery Controller -> Virtual Delivery Agent
- D. Citrix Receiver -> NetScaler -> Citrix StoreFront -> Virtual Delivery Agent

Correct Answer: B

QUESTION 15

Which component is automatically enabled by the installer when a Citrix Engineer installs the Virtual Delivery Agent for Windows Server machines?

- A. Receiver
- B. EdgeSight Agent
- C. Boot Device Manager
- D. Remote Desktop Services

Correct Answer: D

QUESTION 16

A Citrix Engineer needs to provide users on the internal corporate network with access to virtual desktops through Citrix StoreFront.

What must the engineer specify in the configuration settings of the store to meet the requirements stated above?

- A. Beacons
- B. NetScaler
- C. Domain Controller
- D. Delivery Controller
- E. Authentication method

Correct Answer: D

QUESTION 17

Scenario: A Citrix Engineer must use Provisioning Services to provision 50 desktop OS machines. The engineer has installed and configured two Provisioning Services servers to guarantee high availability and now needs to configure the write cache location of the virtual desktops so that failover is possible in case one of the Provisioning Services servers fails.

Which three write cache locations could the engineer choose? (Choose three.)

- A. In the RAM of the virtual desktop
- B. On a Citrix ShareFile storage zone
- C. On a persistent disk attached to the virtual desktop
- D. On the local disk of both Provisioning Services servers
- E. On a fileshare connected to both Provisioning Services servers

Correct Answer: ACE

QUESTION 18

Scenario: A Citrix Engineer configured a VIP on NetScaler to provide secure remote access to applications for HR staff at CCH. After logging in through the Gateway logon page, the HR staff must use single sign-on to access their hosted desktop.

What should the engineer do to ensure that this requirement is met?

- A. Set ICA proxy to ON in the session policy. Add the single sign-on domain. Add the store address under Web Interface. Select override global for the above settings.
- B. Set ICA proxy to ON in the session policy. Add the single sign-on domain. Add the internal VIP under Web Interface. Uncheck override global for the above settings.
- C. Set ICA proxy to OFF in the session policy. Add the single sign-on domain. Add the store address under Web Interface. Uncheck override global for the above settings.
- D. Set ICA proxy to OFF in the traffic policy. Add the single sign-on domain. Add the external DNS name under Web Interface. Select override global for the above settings.

Correct Answer: A

QUESTION 19

Scenario: A hosted application reverts to the default settings every time users log off. The application writes configuration data to C:\myapp\data\settings.ini file.

What should a Citrix Engineer create to ensure the user settings are saved?

- A. A custom Machine HDX policy
- B. A logon script renaming C:\myapp\data\
- C. A policy setting for File System Synchronization
- D. A scheduled task relocating C:\myapp\data\ directory

Correct Answer: C

QUESTION 20

A Citrix Engineer must use the XenDesktop Setup Wizard to provision 50 desktops.

Which machine catalog type should the engineer select to implement hosted shared desktops?

- A. Physical machine catalog
- B. Remote PC Access machine catalog
- C. Windows Server Operating System machine catalog
- D. Windows Desktop Operating System machine catalog

Correct Answer: C
